

Contents

1.	Some intrinsic features of hydroxylamines, oximes and hydroxamic acids: Integration of theory and experiment Peter Politzer and Jane S. Murray	1
2.	Structural analysis of hydroxylamines, oximes and hydroxamic acids: Trends and patterns Peter Politzer and Jane S. Murray	29
3.	The organic thermochemistry of hydroxylamines, oximes, hydroxamic acids and their derivatives Suzanne W. Slayden and Joel F. Liebman	53
4.	NMR spectra of hydroxylamines, oximes and hydroxamic acids Peter Rudolf Seidl and Jacques Fernandes Dias	85
5.	Synthesis of hydroxylamines Artem Melman	117
6.	Synthesis of oximes and hydroxamic acids Andrea Porcheddu and Giampaolo Giacomelli	163
7.	Synthesis of heterocycles from oximes Edgars Abele and Edmunds Lukevics	233
8.	Electrophilic C-amination with O-substituted hydroxylamines, oximes and O-substituted oximes Ender Erdik	303
9.	Rearrangements of hydroxylamines, oximes and hydroxamic acids M. Manuela A. Pereira and Pedro Paulo Santos	343
10.	Electrochemistry of hydroxylamines, oximes and hydroxamic acids Osamu Onomura	499
11.	Use of oximes, hydroxamic acids and related species as reagents in inorganic analytical chemistry Maja Ponikvar and Joel F. Liebman	515
12.	Structural effects on reactivity and properties of oximes and hydroxamic acids Marvin Charton	553

13.	Hydroxylamines and oximes: Biological properties and potential uses as therapeutic agents Yacov Ashani and Israel Silman	609
14.	Nitrosomethanides and their acids: Synthesis, structure and bonding Axel Schulz, Harald Brand and Alexander Villinger	653
15.	Nitroxyl radicals Carlo Galli	705
16.	Natural and biomimetic hydroxamic acid based siderophores Abraham Shanzer, Clifford E. Felder and Yaniv Barda	751
17.	Hydroxylamine, oximate and hydroxamate as α -nucleophiles in dephosphorylation Erwin Buncel, Ik Hwan Um and François Terrier	817
18.	<i>N</i> -Heteroatom-substituted hydroxamic esters Stephen A. Glover	839
