

## Subject Index

- Abbreviated IQ (ABIQ), 468  
*Abilities of Man, The*, 488  
 Ability-achievement discrepancy, 492  
 Academic Competence Evaluation Scale (ACES), 297  
 Academic Intervention Monitoring System (AIMS), 297  
 Acceptance and commitment therapy, 587  
 Accountable health-care organizations (ACOs), 321  
 Acculturation  
   bidimensional model, 120  
   definition, 120  
 Acquiescence, definition of, 639  
 ACT Interest Inventory. *See* Unisex Edition of the ACT (UNIACT) Interest Inventory  
 Action potentials, 512  
 Adaptive Behavior Assessment System, Second Edition, 297  
 Adaptive testing, 656  
 Addiction Severity Index, 575  
 Ad Hoc Committee on Terminology and Classification, 485  
 Adolescent Psychopathology Scale (APS), 282  
 Adult development models of interests, 551  
 Adult mental health settings  
   assessment procedure  
     clinical interview, 252  
     coping, 254  
     diagnostic clarification, 252–254  
     informed consent, 251  
     interpersonal styles, 254  
     personality profile, 254  
     problems and symptoms, 251–252  
     psychosocial background history, 252  
     self-concept, 254  
   diagnostic clarification, 244–245  
   evidence-based assessment, 241–243  
   guidelines, 255  
   implications and recommendations, 254–255  
   inpatients  
     clients' psychopathology, 256  
     comorbidity, 256  
     influence of environment, 256–257  
     risk of harm, 256  
     time constraints, 256  
   integration of tests, 249–250  
   interpretation of tests, 249–250  
   multimodal assessment, 243  
   number of tests, 249  
   preliminary information, 251  
   psychological assessment in, 647  
   referral question, 250–251  
   tests to use, 248–249  
   therapeutic assessment, 255–256  
   treatment planning, 245–246  
   types of psychological assessment  
     cognitive testing, 248  
     interviews, 247  
     performance-based techniques, 247–248  
     self-report inventories, 247  
 Advanced Clinical Solutions (ACS)  
   standard clinical tests, 512  
   for the WAIS-IV and WMS-IV, 485  
 Affective disorders, neuroimaging study of, 524  
 Affective-physiological behavior, 591  
 Age Discrimination in Employment Act (ADEA), 353  
 Ageism, 425. *See also* Older adults  
   effects of myths, 426–427  
   negative myths, 426  
   positive stereotypes, 427  
 Alcohol Use Disorders Identification Test (AUDIT), 338  
 Alpha test, 348  
 American Academy of Clinical Neuropsychology Foundation (AACNF), 323  
 American Association of Correctional Psychologists, 650  
 American Association on Intellectual and Developmental Disabilities (AAIDD), 485  
 American Association on Mental Retardation (AAMR), 485  
 American Board of Clinical Neuropsychology, 322

## 692 Subject Index

- American Psychological Association Standard 2.01 (2002), 526
- Americans with Disabilities Act (ADA), 354
- Analog sampling
- definition of, 593
  - types of, 593
- Antisocial personality disorder (APD), 572
- APA Ethical Standard 9.02b (2002), 526
- Areas under the curve (AUC), 414
- Armed Services Vocational Aptitude Battery (ASVAB), 541
- Army General Classification test, 348
- Army Mental Testing Program, 651
- Artificial intelligence, 168
- Ascendancy-Submission measure, 624
- Assessment bias. *See* Bias
- Assessment interviews
- content areas of, 562
  - purpose of, 559
  - vs. therapeutic interviews, 561
- Assessment process, 3
- information evaluation (*see* Data interpretation)
  - information input (*see* Data collection)
  - information output
    - bias and base rates, 21–22
    - culture and context, 22–23
    - value judgments and cutting scores, 22
- Association of Medical School Psychologists (AMSP), 320
- Asynchrony, in gifted individuals, 489
- Attention-deficit/hyperactivity disorder (ADHD), 264
- Attention index, 455
- Auditory processing (Ga) index, 481
- Automated Neuropsychological Assessment Metrics (ANAM), 515, 652
- Automated testing services, 205–206
- Average daily population (ADP), 397
- Axis I syndromes, personality disorders with, 571
- Back-translation technique, 123
- Bariatric surgery, 333–334
- Basic Interest Scales, 538
- Basic Personality Inventory (BPI), 639
- Bateman, Barbara, 490
- Bayley Scales of Infant Development (BSID), 91
- Beck's model, of depression, 586
- Beck Youth Inventories for Children and Adolescents, Second Edition (BYI-II), 282–283
- Behavioral approaches
- and psychological assessments, 654
  - to validation, 609–611
    - behavioral characteristics, 610
    - experiential interpretation, 611
    - generalizability and interpretation, 610–611
- Behavioral assessment, 583–590
- additional assumptions, 589–590
    - behavioral plasticity, 589
    - cause–effect relationship, 589
    - corollary assumptions, 589
    - multivariate multidimensionalism, 589
    - temporal variability, 590
  - basic assumptions, 590
  - contextual variables, operationalization and quantification, 591
  - core characteristics of, 583
  - dysfunctional internal psychological processes, 584
  - empirical approach, 588–589
  - environmental contextual factors
    - physical context, 591
    - social context, 591
  - and functional analysis, 585
  - goal of, 591
  - intrapersonal contextual factors
    - affective-physiological behavior, 591
    - overt-motor behavior, 591
    - verbal-cognitive behavior, 591
  - learning theory, 586–588
    - classical conditioning, 586
    - cognitive experience, 586–587
    - emotional experience, 586–587
    - functional contextualism, 587–588
    - operant conditioning, 586
  - personality-oriented approach, 584
  - psychodynamic approach, 583–585
  - questionnaires for
    - functional relations, measurement of, 594
    - sensitivity to change, 594
    - specific behaviors, measurement of, 594
  - target behaviors, operationalization and quantification, 591
- Behavioral function, questions about, 594
- Behavioral interviewing, 593
- Behavioral model, 567
- Behavioral observation, 593
- Behavioral plasticity, and behavioral assessment, 589
- Behavioral questionnaires, 594
- Behavioral summary, 271
- Behavior Assessment System for Children–Second Edition (BASC-2), 278–279, 297
- Behavior, mechanistic view of, 503
- Behavior therapist, definition of, 585
- Behavior, topographical analysis of, 590–591
- Bell Curve, The*, 451
- Bellevue Intelligence Tests, 472
- Bernreuter Personality Inventory (BPI), 624
- Bias, 82
- African American, 95
  - American Indians, 82
  - Asian Americans, 82
  - Association of Black Psychologists (ABP), 83–84
  - Binet intelligence scales, 87
  - Blacks, 82
  - character of, 84
    - hypothetical construct, 84
    - intervening variable, 84
    - norm group, 85
    - norming distribution, 84
    - oversampling, 85
    - physical and biological measurements, 85
    - raw scores, 85

- standard scores, 85
- test development procedures, 84
- tryout sample, 84
- construct validity
  - Chinese/Japanese ancestry, 100
  - coefficients of congruence, 100
  - definition, 99
  - factor invariance, 99
  - intelligence, 101
  - internal consistency reliability, 100
  - MMPI-2, 101
  - Papagos, 99
  - Raven's colored matrices, 100
  - sample factor structure, 99
  - two-factor solution, 99
  - Woodcock-Johnson III, 100
- content validity
  - behavior rating scales, 98
  - cultural familiarity, 97
  - definition, 96
  - differential item functioning, 97
  - ethnic correlations and rate orders, 98
  - level II ability, 98
  - P*-decrements, 97
  - semantic ambiguity, 97
- cultural equivalence, 105
- cultural loading, 88–89
- cultural test bias hypothesis (CTBH), 91
  - American racial/ethnic minorities, 92
  - item/subtest refinements, 92
  - logic of, 92
  - model, 92
- definition, 83
- differential predictive validity, 87
- distinct aptitude and personality, 87
- divergent views, 85
- effects and implications of test, 86
- environmental factors, 82
- and etiology, 90
- examiner–examinee relationship, 104
- examiners' and language bias, 87
- expert reviews, 87
- genetic influences, 82
- group differences, 90
  - American Indian, 90
  - Asian samples, 91
  - genetic and environmental explanations, 91
  - intelligence batteries, 90
  - interactionist perspective, 91
  - matching, 91
  - racial and ethnic group hierarchy of intelligence, 90
  - verbal and spatial abilities, 90
- groups and individuals, 90
- Harrington
  - genetic populations, 93
  - predictive validity, 93
  - Wechsler scales, 93
- Hispanics, 82
- inappropriate content, 87
- inappropriate standardization samples, 87
- inequitable social consequences, 87
- intelligence tests, 83
- IQ controversy, 82
- Jensen
  - predictive and construct validity, 95–96
  - rational judgments, 95
  - situational bias, 96
- mean differences
  - bivariate and multivariate techniques, 95
  - distribution and variation, 95
  - egalitarian fallacy, 94
  - skewed scores, 94
- measurement of different constructs, 87
- Mexican American, 95
- nature and nurture, 106
- PASE vs. Hannon*, 87
- predictive validity
  - Ammons and Ammons Quick Test (QT), 102
  - vs.* content and construct validity, 101
  - Cortez vs. Rosen*, 101
  - Draw-a-Design and Draw-a-Child, 103
  - Gates Reading Survey, 102
  - K-ABC, 103
  - Lorge-Thorndike verbal and nonverbal IQs, 102
  - McCarthy Scales, 103
  - overprediction, 102
  - path modeling, 103–104
  - Potthoff comparisons, 103
  - regression line, 101
  - residuals, 103
  - SAT, 102
  - scoring patterns, 103
  - tests of basic experiences, 103
- and social issues, 89
- social values and beliefs, 84
- translation and cultural testing, 105
- K-ABC, 106
- Tactual Performance Test, 106
- test adaptation, 105
- types of, 83
- unfairness, 87
- White Americans, 83
- Big Five personality traits, 538
- Bilingual-group design, 134
- Binet, Alfred, 645
- Biopsychosocial model, medical settings
  - affect measures, 330
  - alcohol and substance abuse, 338
  - bariatric surgery, 333–334
  - obesity, 333
  - presurgical psychological evaluation, 333
- cognitive screening measures, 329
- comprehensive batteries, 330
- Dementia and Delirium Rating Scales, 330
- forensic neuropsychological, 330
- genetics, 334
- modalities

## 694 Subject Index

### Biopsychosocial model, medical settings (*continued*)

- comprehensive neuropsychological batteries, 329
- direct observation, 328
- psychophysiological measurement, 328
- self-monitoring, 328
- self-report measures, 328
- neuropsychological battery, 329
- neuropsychological dysfunction, 336–337
- normative standards, 329
- organ transplant surgery, 332–333
  - noncompliant patient behavior, 332
  - PACT rating scale, 333
  - premorbid health habits, 333
  - psychological assessment goals, 332
  - QOL, 333
- personality measures, 330
- premorbid, 327
- psychiatric conditions, 334–336
  - MMPI-2-RF, 335
  - multidimensional instruments, 335
  - objective personality measures, 331
  - posttraumatic stress disorder measures, 331
  - self-report measures, 331
  - structured clinical interviews, 331
- psychological adjustment to illness, 330
- psychopathology symptoms, 330
- psychosomatic disorders, 337–338
  - SCL-90-R, 337
  - somatization disorder, 337
- QOL and outcomes research, 330, 338–339
- screening batteries, 330
- screening instruments, 329
- spine surgery, 334
- structured clinical interviews, 330
- surgical interventions
  - postsurgery, 332
  - presurgery, 332
  - psychological outcome, 331
  - surgical interventions, 331–332
- timing, 328–329
- trauma and sexual abuse, 338
- types of referrals, 331
  - differential diagnosis, 331
  - provision of treatment, 331
  - referral question, 331
  - treatment planning, 331
- Bipolar disorder (BPD), 264
- Black–White differences, 96
- Blank screen metaphor, 603–604
- Bleiberg, Joseph, 515
- Board certification, 317–319
- Board of Professional Psychology, 646
- Bootstraps effect, 630
- Boston Qualitative Scoring System, 516
- Boulder, 382
- Brain
  - anatomy, 502
  - expression of language, 503
  - functioning, hierarchical organization of, 504
  - localization, 503
  - tissues in, 503
    - gray matter, 503
    - white matter, 503
- Brain–behavior relationship, 504
- Brain impairment, measurement of, 504
- Brief Symptom Inventory (BSI), 338
- British Ability Scales (BAS), 457
- British Psychological Society (BPS), 196
- Broca’s aphasia, 503
- Broca’s area, 503
- Broca, Paul, 503
- Bronner, Augusta F., 472
- Brown Attention-Deficit Disorder Scales for Children and Adolescents (BADDs), 284
- California Verbal Learning Test, 511
- Call-light use, withdrawing negative reinforcement for, 585
- Cambridge Neuropsychological Test Automated Battery (CANTAB), 515
- Campbell Interest and Skill Survey (CISS), 538–539
- Canadian Psychological Association, 378
- Canadian Study of Health and Aging (CSHA), 526
- Cancer, older adults, 430–431
- CAPA Interest Inventory, 543
- Cardiovascular disease (CVD), older adults, 431
- Career Assessment Inventory—Enhanced Version (CAI-EV), 542
- Career Assessment Inventory—Vocational Version (CAI-VV), 542
- Career Development Quarterly*, 538
- Carroll, John B., 477, 480
- Case history interviews, 559
- Cattell-Horn-Carroll (CHC), 452
- Cattell, James McKeen, 645
- Causal assertion, essential conditions for, 595
- Causal case modeling, 597
- Causal functional relationship identification, 595–597
- Causality-related assessments, 507
- Causal modeling, 597
- Cerebrovascular disease, older adults, 431–432
- Change-sensitive scores (CSS), 471
- Child Behavior Checklist (CBCL), 273, 280–281, 297
- Childhood psychopathology, 483
- Child mental health settings
  - actuarial process, 276–277
    - PIC-2 subscale, 277
    - scale interpretations, 276
  - APS, 282
  - BADDs, 284
  - BASC-2, 278–279
  - BASC-2 Progress Monitor, 284
  - behavioral summary, 271
  - BYI-II, 282–283
  - CBCL, 280–281
  - characteristics of, 262
  - Children’s Depression Inventory, Second Edition, 281
    - child self-report (CDI 2:SR), 281

- Parent Report (CDI 2:P), 281
- Teacher Report (CDI 2:T), 281
- clinical issues
  - disagreements among informants, 274
  - informant selection, 273–274
  - multidimensional vs. focused assessment, 274
- clinical utility, 276–277
- comorbid conditions, 263–265, 272
  - ADHD, 264
  - CD, 264
  - cluster analysis, 265
  - depression and anxiety, 265
  - diagnostic overshadowing, 265
  - internalizing disorders, 264
  - masking, 265
  - meta-analytic examination, 263
  - MTA data, 264
  - ODD, 264
- CRS-3, 279–280
- developmental and motivational issues
  - dimensions and content of problems, 262–263
  - intrinsic motivation, 263
  - psychosocial development, 263
- evidence-based assessment, 267
- family adjustment
  - MSI-R, 284–285
  - PSI, 285
- MACI, 283–284
- managed care, 266–267
  - ADHD, 266
  - differential diagnosis, 266
  - objectives and philosophy of, 266
- MMPI-A, 282
- multidimensional assessment, 271–272
- multidimensional inventories, 267
- multisource assessment, 272–273
- PIC-2, 267–268
  - defensiveness, 268
  - dissimulation, 268
  - inconsistency scale, 268
  - scales, subscales and psychometric characteristics, 269
- PIY, 268–270
- problem behavior scale, 280
- problem intensity and chronicity, 265
- psychological assessment in, 646–647
- RCMAS-2, 284
- referral process, 266
- reliability, 274–275
  - internal consistency, 275
  - stability of scales, 275
- SBS, 270–271
- TRF, 280–281
- validity, 275–276
  - construct, 275
  - content, 275
  - criterion, 275
  - discriminant, 275, 276
- YSR, 280–281
- Children's Apperception Test, 298
- Children's Depression Inventory, Second Edition (CDI 2), 281
- Chinese Americans, 93

- Chronic obstructive pulmonary disease (COPD), older adults, 431
- Circular reasoning, 584, 585
- Civil law, 377
- Civil litigation, 507
- Clarification technique, 565
- Classical conditioning, and learning theory, 586
- Classical test theory (CTT)
  - internal consistency reliability, 51
  - limitations, 51
- Client approach, to interview, 562–563
  - expectations, 563
  - perceptions of psychologist, 563
  - purpose/motive, 562
  - voluntary/involuntary visit, 562
- Clinical interview
  - personality assessment, 570–574
    - culture, role of, 571
    - incremental validity, 574
    - psychiatric diagnoses and clinical interviews, 571–574
    - vs. personality disorder, 570
  - psychopathology assessment, structured vs. unstructured, 567–570
  - structure of, 564–565
    - detailed inquiry, 564
    - formal inception, 564
    - reconnaissance, 564
    - termination, planning and intervention, 565
- Clinical judgment, 35
  - clinician characteristics, 35
  - confirmatory distortion, 36
  - cross-sectional and longitudinal methods, 40
  - decision-making processes, 35
  - decision-making strategies, 36
  - experience and accuracy, 37
    - cognitive dimensions, 37
    - conditions of uncertainty, 38
    - developmental training and supervision models, 38
    - feedback collection, 37
    - impaired ability, 37
    - judgmental heuristics, 37
    - meta-analysis, 39
    - processes, 37
  - gender bias, 35
  - mental health clinicians, 40
  - moderators, 40
  - overall effect, 39
  - problems and limitations, 36
  - reliability and validity, 36
  - specialized training, 40
  - utility of, 40
    - construct formulas, 40
    - cutoff score, 41
    - debiasing techniques, 42
    - meta-analysis, 41

## 696 Subject Index

- Clinical judgment (*continued*)  
    multiple forms of data, 41  
    proponents, 41  
    scientific judgment, 41  
    variable manipulation, 36
- Clinical vs. mechanical prediction, 26  
    box score methods, 28  
    clinician-generated algorithms, 27

## 714 Subject Index

- Test of Adolescent and Adult Language, Fourth Edition, 302
- Test of Adult Basic Education (TABE), 408
- Test bias. *See* Bias
- Test of Early Mathematics Ability—Third Edition, 302
- Testing condition equivalence, 105
- Test of Irregular Word Reading Efficiency (TIWRE), 302
- Test of Memory and Learning (TOMAL), 98
- Test of Memory Malinger (TOMM), 509
- Test of Nonverbal Intelligence (TONI), 511
- Test score fairness
  - external evidence
    - prediction bias, 74
    - selection, 75
  - history, 70
  - internal evidence
    - differential item and test functioning, 73
    - item bias and sensitivity review, 72–73
    - measurement invariance, 73
    - reliability generalization, 74
  - models, 71
  - terms and definitions, 71–72
- Test score reliability
  - definition, 66
  - generalizability theory, 67
    - advantages, 67
    - alternate forms, 70
    - coefficients, 67
    - internal consistency, 67
    - interrater consistency and consensus, 69–70
    - local reliability and conditional error, 68
    - temporal stability, 68–69
  - reliability generalization, 70
- Test score validity
  - definition, 59
  - excessive broadness, 60
  - external sources, 63
    - consequential validity, 65–66
    - convergent and discriminant validity, 63
    - criterion-related validity, 63–65
  - internal sources
    - content validity, 60–61
    - examinee response processes, 61
    - structural validity, 62–63
    - substantive validity, 61–62
  - validity generalization, 66
- Tests *vs.* inventories, 537
- Tests of Variables of Attention (TOVA), 106
- Test User Qualifications Working Group (TUQWG), 196
- Texas Assessment of Academic Skills (TAAS), 88
- Thematic Apperception Test (TAT), 223, 233, 298, 601, 614
- Therapeutic Assessment approach (Finn), 647
- Therapeutic *vs.* assessment interviews, 561
- Therapeutic assessment (TA), 142, 255–256
  - definition, 148
  - empirical support, 149–150
  - process, 148–149
- Thinking ability, 481
- Third-party observers, 201
- Thorndike, Robert L., 461
- Time sampling, 591–592
- Title I of the Civil Rights Act, 354
- Title VII of the Civil Rights Act of 1964, 353
