

Subject index

- d*-separation, 51, 53, 60, 82, 394
- Amanda Knox case, 57
- Analysis
- evidence sensitivity, 402
 - of conflict, 410–418
 - parameter sensitivity, 403
 - qualitative, 389–402
 - sensitivity, 402–10
 - one-way, 403–5
 - to prior distribution, 408–10
 - two-way, 405–8
- Arrow, 46
- Artificial intelligence, 19
- Average-out and folding back algorithm, 71
- Background
- of trace material, 132, 137–42, 190, 316
- Background information, 4, 13
- Bayes action, 351
- Bayes factor, 15, 87, 90, 123, 218
- Bayes risk, 40
- Bayes' theorem, 6–7, 9, 52, 87, 251
 - continuous version of, 291
 - for multiple propositions, 123
 - odds form, 15
- Bayesian decision theory, 39, 344
- Bayesian Multinet, 64
- Bayesian network
 - chain rule for, 57
 - construction of, 103–12, 321
 - discrete, 46–8
 - fragment, 196, 225, 266, 267, 370
 - object oriented, 74–9, 203, 246, 370–387
 - solving of, 79–82
 - unfolded representation of, 79
 - with continuous variables, 281–313
- Bayesian paradigm, 2, 291–2
- Bayesian subjectivism, 19
- Behaviour
 - rational, 32
- Blood, 192
- Blood alcohol concentration, 284, 286, 294, 299, 311, 410
- Brier's rule, 353
- Causality, 61, 82
- Central Limit Theorem (CLT), 287
- Clique, 69
- Clique potential, 295, 297
- Clique separator, 297
- Composition, 397
- Conflict, 254–6
 - detection of, 411–14
 - measure of, 411, 412
 - partial, 414

SUBJECT INDEX 439

- resolution of, 415–18
 - tracing of, 414–15
- Connection
 - converging, 51
 - diverging, 51
 - serial, 51
- Consecutive matching striations (CMS), 115, 271
- Consequence, 29
- Consignment inspection, 303, 305, 328–35, 357–66, 371–7
- Contradiction, 252–4
- Convergence, 258–60
- Corroboration, 256–8
- Correspondence, 137, 142, 197
 - partial, 220–223
- Database search, 234–41, 266, 366–8, 406
 - likelihood ratio for, 234–7
 - posterior probabilities after, 237–41
- Decision, 2, 29
 - optimal, 344, 357, 359
 - posterior, 351
 - prior, 351
 - tree, 35–8, 58
- Decision analysis, 315, 343–69
 - one stage approach, 345–8
 - two stage approach, 348–52
- Decision making, 28–42, 343
- Degree of belief, 1, 85, 271
- Dependence
 - probabilistic, 4, 134
- Difficulty of conjunction, 250
- Discriminating power, 236
- Distribution
 - beta, 302–4, 328, 331, 338, 359, 362
 - beta-binomial, 328
 - binomial, 292, 302, 328, 332
 - bivariate Normal, 287, 296
 - conditional, 288, 291
 - conjugate prior, 303
 - cumulative, 391
 - Gamma, 116, 309
 - geometric, 292
 - lognormal, 293
 - marginal, 275, 288, 291
 - Multivariate Normal, 287, 293
 - negative binomial, 292
 - Normal, 273, 275, 281, 283–7
 - mixture of, 293, 309
 - standard, 285
 - Poisson, 116, 292, 337, 339
 - posterior, 291
 - prior, 90, 291, 331
 - standard statistical, 115–17
 - uniform, 59, 331, 359
- DNA
 - aspects of evaluation of, 266–71
 - kinship analysis, 227–34, 344–52, 378–82
 - questioned maternity, 232–4
 - questioned paternity, 227–32
 - mixture, 223–7
 - mutation, 229
 - of source, 383–5
 - one-stain one-offender scenario, 201
 - peak area and height, 223
 - small quantities, 246
- Drag coefficient, 253, 261–2
- Dutch Book argument, 28
- Elimination algorithm, 69
- Evaluation
 - given activity level
 - propositions, 129–58
 - given crime level propositions
 - supposing a single offender, 159–66
 - supposing multiple offenders, 166–8
 - given source level
 - propositions, 113–28
 - of DNA profiling results, 196–248
 - of scientific findings, 85–112
 - of transfer material
 - assuming a direct source relationship, 130–150
 - found on a person of interest, 185
 - potentially left by the offender, 159–85

440 SUBJECT INDEX

Evaluation (*continued*)

- with uncertainty about the true source, 154–8

- principles of, 90–100

- using graphical models, 103–12

- with alternative proposition involving relatives, 206–23

Event, 3

Evidence, 4

- combination of, 16, 249–80

- hard, 52

- soft, 52

- weight of, 43

Exchangeability, 43

Expectation

- conditional, 288

Experiment, 59, 351

- cost of, 351, 363

Expert judgment

- subjective, 142

Explaining away, 394–5

- opposite of, 395–6

Explanation, 22, 56

- causal, 61

- Deductive-Nomological (D-N), 22

- Inductive-Statistical (I-S), 23

- Statistical-Relevance (S-R), 24

Explosives, 393

Fallacy

- of the transposed conditional, 9, 88

Features

- extrinsic, 114, 129

- intrinsic, 114, 129

Fingermarks, 254, 258, 259, 262–5, 268,

- 412, 415, 416

Firearms, 177, 271–80

Flammable liquid, 394

Footmarks, 13

Footwear marks, 169, 181

Forensic intelligence, 117

Frequency, 21

Gamble, 30

Gas chromatography/mass spectrometry (GC/MS), 397

Genotype probability

- conditional, 198, 212–14

Glass, 133, 148, 315

Graph

- cluster, 66

- directed, 46, 67

- directed acyclic (DAG), 47, 389

- moral, 67

- triangulated, 67, 69

Gunshot residues (GSR), 142, 272–80, 335–342, 390

Handwriting examination, 122, 252, 256, 258, 262–5, 392, 412, 415, 416

Hierarchy of propositions, 86, 246

Hypothesis, 4

- composite, 357

- exhaustive, 13

- mutually exclusive, 13

Illegal drugs, 139, 393, 397

Independence

- asymmetric, 64, 269

- conditional, 50–51, 255, 297

- decision rule for, 53

- graphical model for, 51–3

- in influence diagrams, 60–61

- probabilistic, 4, 134

Individualization, 29, 31, 33, 35, 36, 41, 59, 61, 72, 73, 366

Inference, 2

- Bayesian inductive, 26–8

- deductive, 15

- direction of, 400

- inductive, 19

- statistical, 291

- to the best explanation, 25–6

Influence

- qualitative, 389–92

Influence diagram, 58–61

- Limited Memory (LMID), 59, 72

- solving of, 71–4

Information

- expected value of, 38–42

- partial

- expected value of (EVpI), 39, 40, 351, 352, 361

SUBJECT INDEX 441

- perfect sample
 - expected net value of (ENVSI), 366
 - expected value of (EVSI), 366
- Ion mobility spectrometer (IMS), 140, 393, 397
- Island problem, 237
- Jeffrey's rule, 19, 43, 52
- Junction tree, 67, 69–71, 306
- Knowledge, 5
- Kullback-Leibler measure of relative entropy, 43
- Laboratory error, 241–6
- Likelihood, 7, 9
- Likelihood ratio, 15, 56, 86, 87
 - expected, 319, 325
 - logarithm of, 43, 407
- Link
 - functional, 58
 - informational, 58
 - probabilistic, 58
- Loss
 - expected
 - prior, 359
 - expected with partial information (ELpI), 40
 - expected with perfect information (ELPI), 39
 - function, 34–35, 368
 - symmetric, 358
 - minimal expected, 35
- Marginalization, 10
- Markov Chain, 52
- Markov property, 56, 82
 - for junction trees, 71
- Match, 114
- Maximum cardinality search algorithm (MCS), 69
- Missing suspect, 203–6
- Model, 5
- Modified Griess Test (MGT), 272
- Moralization, 67
- Mutation, 248
- Network class, 76, 246, 371
- Node, 46
 - chance, 58
 - child, 46
 - decision, 58
 - policy for, 71
 - expansion of, 147
 - hidden, 77
 - hypothesis, 53
 - input, 76, 371
 - instance, 77, 371
 - level of detail, 106
 - observational, 53
 - output, 77, 371
 - parent, 46
 - root, 47
 - utility, 58, 343
- Normative point of view, 19
- Odds
 - posterior, 15, 87
 - prior, 15, 87
- Parameter, 289
 - unknown, 90, 357
- Particle detection, 393, 396, 397
- Policy
 - optimal, 72
- Population
 - relevant, 25, 138, 168
 - structure, 385
- Population proportion, 19, 21
- Posterior potential, 297
- Pre-assessment, 100–3, 314–43
- Preference, 2
- Probability
 - assignment, 46
 - as a question of decision making, 352–7
 - compound, 136, 138, 147
 - conditional, 5
 - of transfer, 152
 - conditional distribution, 10, 56
 - cumulative, 391

442 SUBJECT INDEX

Probability (*continued*)

density function, 30, 90, 273, 282
 distribution, 10, 281
 epistemic, 163, 176
 extension of the conversation, 6, 135
 first law, 3
 function, 3
 joint distribution, 10, 56, 79
 laws of, 2–6
 marginal distribution, 11, 56, 297
 mass function, 30, 281
 of a false positive, 242, 405
 of error, 266, 405
 of false negative, 245
 of fortuitous presence, 188, 190
 of leaving trace material
 innocently, 163
 prior, 7, 216
 second law, 3
 significance, 285
 subjectivist interpretation, 42, 54, 315
 table, 47
 third law, 5
 tree, 7–9, 48
 Probability potential, 295
 Profile probability, 20, 197, 406
 conditional, 23
 Proposition, 3, 87
 activity level, 94–7
 crime level, 97–100, 268
 more than two, 122–8, 214–20, 247
 relevant, 90
 source level, 92–4, 317

Qualitative belief propagation, 402

Qualitative probabilistic network
 (QPN), 389

Random match probability, 20, 198

Reasoning

abductive, 22, 25
 evidential
 network for, 53–6
 inductive, 22
 under uncertainty, 1–28
 with Bayesian networks and influence
 diagrams, 65–82

with graphical models, 45–65
 with total evidence, 16–17
 with uncertain evidence, 18–19

Redundancy, 259

Relevance, 1, 3–5, 55, 61–3, 83, 98, 159,
 165, 185, 190, 266, 268, 352,
 407, 413

epistemic, 4

graphical model for, 48

Representation theorem, 42

Robustness, 409

Route diagram, 84

Scale of conclusions, 251, 345

Scoring rule, 352–7

logarithmic, 353

quadratic, 353

Separator potential, 296

Sign addition operator, 396

Sign product operator, 396

Source

primary, 139, 140, 400, 401

Specimen, 328

Standard deviation, 289

State of nature, 29

Statistic, 289

Strategy

optimal, 36, 72

Straw model, 411

Surveillance camera recordings, 301

Syllogism

Bayesian statistical, 20

statistical, 19

Symmetry, 5, 9, 44, 397

Synergy

additive, 392–3

product, 394–6

Textile fibres, 121, 131, 136, 137, 142,
 150, 163, 316–28

Transfer, 130, 190, 316

primary, 129, 140, 336, 398

secondary, 129, 140, 398, 400

tertiary, 140, 398, 400

two-way, 150–153, 247, 321, 326

Transitivity, 396

Two stains no putative source
 problem, 117–22

SUBJECT INDEX 443

Two stains one offender problem, 182–5,
267–71

Two-trace problem, 104, 106

Uncertainty, 1, 343

Utility, 2

 expected, 30

 with partial information
 (EUpI), 352

 with perfect information
 (EUPI), 351

 function, 29, 58, 344

 maximum expected, 30, 33–4

 theorem, 44

 theory, 29–35

Variable

 continuous random, 47, 273

 expected value of, 21, 283

 discrete random, 10, 47

 random, 10, 281

Variance, 273, 288, 289

Wigmore chart, 82
