

SUBJECT INDEX

Note: Page numbers with f indicate figures; page numbers with t indicate tables; page numbers with n indicate end notes.

- A-B-A design 54–5, 55f
- A-B design 52–3, 53f, 54f
- abolishing operations (AOs) 232f, 233–4
 - defined 232f, 233
 - examples of 234
- acceptance, in ACT 411–12
- Acceptance and Commitment Therapy (ACT) 409–14, 409f
 - acceptance in 411–12
 - approach to thinking 410–11
 - commitment in 412
 - purpose of 409
 - success of 413
 - “thoughts cause behavior” hypothesis 409–11, 409f
- accuracy 31
- across-individual replication 62
- adaptive behavior 4, 5t
- advertising, in Pavlovian conditioning 110
 - agreement: in event recording 37–8, 37t
 - in outcome recording 35, 36t
- Alexander, Bruce 367
- alternating-treatments design 55–7, 56f
- analytic dimensions of applied behavior analysis 19
- animal behavior on farm, shaping 214
- antecedent, of operant behavior 117
- antecedent–behavior–consequence 401
- antecedent stimulus 321–47
 - defined 321–2
 - Direct Instruction (DI) of reading skills 333–4
 - discriminated operant behavior 322–7
 - discrimination training 330–5
 - discriminative stimulus (S^D) 324–5, 324f, 329–30
 - generalization 335–44
 - phylogenetic and Pavlovian stimulus control 322
 - S^{DP} 325–6, 326f
 - stimulus–response chains 340–4
 - S^A 325
 - three-term contingency 327
- applied behavior analysis 18, 19
- applied dimensions of behavior analysis 19
 - arrange an effective reinforcer 394
 - assumptions, of behavior analysis 6–8
 - attention 370–1
 - autism 18, 155, 186, 191, 235, 341, 390–4, 404
 - automatic reinforcer 186–7
 - automating shaping 221–4, 223f
 - avoidance behavior 151–2
 - Ayllon, T. 205
 - Azrin, N. H. 205
- backup reinforcer 207
- backward chaining 341–2
- Baer, Donald 19
 - behavior: adaptive 4, 5t
 - contingent consequences for changing 124–5
 - defined 1–2
 - dependent variable as 26
 - differential reinforcement of incompatible behavior (DRI) 190, 191
 - differential reinforcement of other behavior (DRO) 191
 - discrimination training: practical applications of 331–3
 - escape 271
 - experimental analysis of behavior 17–18
 - individual 1–2
 - influenced by stimuli, external or internal 2
 - instrumental 130
 - of living organisms 2
 - maladaptive 5, 309–10
 - matching law to influence 368–70, 369t, 370t
 - mentalistic explanations of 7–10, 230–1, 236–7
 - negative reinforcement to influence 155–6
 - operant 117–41
 - operant extinction to influence 184–7, 185f
 - positively influencing 5, 26, 47, 138, 153–4, 157, 162, 206, 308
 - positive reinforcement of 155–6
 - predicting 3–4, 5t
 - private 2, 8
 - public 2
 - spurious (false, fake) explanations for 9–10
- behavior, measuring 28–32
 - behavioral definitions 28–32
 - dimensions of behavior 32–3
 - direct observation of 28
 - direct-observation methods 33–42
 - self-reports of 27–8
- behavioral definitions 28–32
 - finalizing 30
 - interobserver agreement (IOA) 30–1
 - observable and objective 29–30
 - refining 29
 - social validity of 29–30
- behavioral determinants 15–17
- behavioral epigenetics 16–17
 - nature 15–16
 - nurture 16
- behavioral economics 297–8, 298f
- behavioral epigenetics 16–17
- behavioral research, understanding 23–45
 - behavior, measuring 27–45
 - correlation vs. causation 24–5
 - experiments, behavioral 25–7
 - variables 24
- behavioral service delivery 18, 19
- behavior analysis:
 - assumptions of 6–8
 - defined 3
 - goals of 3–6
 - introduction to 1–21
- Behavior Analyst Certification Board (BACB) 18–19, 421–2
 - behavior analysts: activities of 17–20
 - applied behavior analysis 18, 19
 - behavioral service delivery 18, 19

- experimental analysis of behavior 17–18
- Organizational Behavior Management 20
- behavior change 64–76
 - convincing 65–7, 66f, 67f
 - patterns of 65
 - reasons for 71–2; see *also* visual analysis of behavior
- The Behavior of Organisms* (Skinner) 170
- believability 31
- blocking effect 99, 99f, 113n
- Board Certified Assistant Behavior Analyst (BCaBA) 19
- bounce 53, 54f
- break-and-run pattern 294
- breakpoints 244, 244f
- Brown, Derren's Netflix special 402–3
- Carroll, Marilyn 367
- causation, correlation vs. 24–5
- causes, functional variables
 - distinguished from 7
- certification examination 19
- chain *see* stimulus-response chain
- chaining *see* backward chaining; forward chaining
- cheating, reinforcement and 160, 161
- choice 351–85
 - defined 352
 - impulsive choice 372–80
 - outcomes, choosing between uncertain 357–72 (*see also* matching law/equation)
 - reinforcer efficacy measured by 244
 - rich Uncle Joe experiment 356–7
 - self-control choice 373
- choice, variables affecting 352–6
 - effort 354, 354f
 - reinforcement vs. no consequence 353, 353f
 - reinforcer delay 355, 355f
 - reinforcer size/quality 353–4, 353f
- choking under pressure 159–60
- circular logic 231, 241–3
- classical conditioning *see* Pavlovian conditioning
- clicker training 207–8, 211–12
- clinical psychology, breaking rules in 408–14; see *also* Acceptance and Commitment Therapy (ACT)
- Cologne Opera House 133
- commitment: in ACT 412
 - strategies 378–9, 379f
- comparison (A-B) design 52–3, 53f, 54f
- compliance 405–6
- conceptual dimensions of applied behavior analysis 19
- conditioned punishers 272–4
 - arranging effective 273–4
 - defined 272
 - primary punishers compared to 273
- conditioned reinforcers 202–4
 - arranging effective 207–10
 - backup reinforcer 207
 - clickers 207–8
 - clicker training with humans 211–12
 - CS redundancy 209–10
 - defined 202
 - generalized 207
 - Pavlovian learning and 202–3, 203f
 - salient conditioned reinforcer 207–8
 - signaling large delay reduction to backup reinforcer 208–9, 210f
 - token economy 204–6
 - verbal learning and 203–4
 - in zoos 210–11
- conditioned response (CR): defined 88, 88f
 - fight-or-flight response 93, 94
 - psychological function of verbal stimuli and 399
 - in PTSD 107–8
 - in spontaneous recovery 105–6, 105f, 106f
- conditioned stimulus (CS): defined 88, 88f
 - conditioned punishers and 272–4, 275
 - conditioned reinforcers and 202–3
 - in Pavlovian conditioning 93–4
 - psychological function of verbal stimuli and 399
 - in PTSD 107–8
 - redundancy in 98–9, 99f, 209–10
 - salient 96
 - signaling delay reduction to US 94
 - signaling large delay reduction to US 96–8, 97f
 - signaling when US is coming 94, 94f
 - signaling which US is coming 94, 95f
 - in spontaneous recovery 105–6, 105f, 106f
- confounded variables 54–5, 57, 59, 62, 64, 173
- consciousness 343–4
 - consequences: contingent 124–5
 - defined 117–18
 - functioning as reinforcers 260t
 - future, steeply discounting value of 377–8, 378f
 - noncontingent 122–4
 - of operant behavior 117–41, 118f, 119t
 - punishers 259–64
 - punishment 258–64
 - reinforcement 126–7, 128f, 137–8
 - reinforcement vs. no 353, 353f
 - reinforcers 126, 128–31, 129f, 130f
 - rewards 126–7
- contact with the antecedent stimulus 394
- contingency: in effective reinforcers 245
- response-consequence contingencies 119–21
- contingency management 125, 309–10
 - to address maladaptive human behavior 309–10
 - of substance-use 310, 391
- contingency-shaped behavior 401
- contingent consequences 124–5
 - changing behavior with 124–5
 - examples of 122t
 - response-consequence contingencies 119–21
- continuous reinforcement 290, 310, 311
- convincing behavior change 65–7, 66f, 67f
- corneal reflex 84
- correlation vs. causation 24–5
- creativity 159
- Csikszentmihalyi, Mihaly 216, 221
 - cumulative records: defined 292–3
 - in fixed-ratio (FR) schedules 292–4
 - idealized 306, 307f
 - illustration of 293f
- Darwin, Charles 15
- determinants of behavior 8–17
 - behavioral epigenetics 16–17
 - nature 15–16
 - nurture 16
 - scientific method to reveal 11–14
- delay-bridging 206
- delay discounting 375–80
- commitment strategies for reducing 378–9, 379f
 - daily-exposure training for reducing 380
 - hyperbolic 375–7, 376f
- influencing impulsive choice 377–80, 378f, 379f
- delay-exposure training 380
- delay of gratification 356
- dependent variables 24, 26, 44, 97
- differential reinforcement 187–92, 311
 - of alternative behavior (DRA) 191
 - defined 187, 213
 - differentially reinforcing rate of operant behavior 192
 - differentially reinforcing response topography 190–2
 - effective use of 189–90, 190f
 - of high-rate behavior (DRH) 192
 - of incompatible behavior (DRI) 190, 191
 - of low-rate behavior (DRL) 192
 - of other behavior (DRO) 191
 - of problem behavior 188–9
 - punishment combined with 267–8
 - shaping in 213
 - of variability 191–2
- dimensions of behavior 32–3
 - duration 32
 - frequency 32
 - latency 32
 - magnitude 33
- dimensions of applied behavior analysis 19

- Direct Instruction (DI) of reading skills 333–4
- direct observation 33–42
 - defined 28
 - duration recording 41–2
 - event recording 36–8
 - flow chart used to choose appropriate method of 35f
 - interval recording 39–40
 - for measuring behavior 28
 - outcome recording 33–6
 - disagreement: in event recording 37–8, 37t
 - in outcome recording 35, 36t
- discriminated operant behavior 322–7
 - defined 323
 - S^P 324–5, 324f
 - S^{DP} 325–6, 326f
 - S^A 325
 - three-term contingency 327
- discrimination training 330–5
 - defined 330
 - Direct Instruction (DI) of reading skills 333–4
 - to improve stimulus control 336–7, 337f
 - methods of, effective 330–1
 - to positively influence behavior 331–3
- discrimination-training approach 343–4
- discriminative stimulus (S^D) 324–5, 324f
 - defined 324
 - establishing operations and 329
 - Skinner's research on 324–5, 324f
- Dog Understands 1022 Words* (YouTube video) 396
- Dorsey, Jack 309
- Dostoyevsky, Fyodor 4, 21n
- drug reinforcers, substitute 367–8
- duration 32
- duration recording 41–2
 - calculating IOA when using 41, 42t
 - defined 41
 - when to use 35f, 41
- echoic 392
- effort 354, 354f
- elicited phylogenetic behavior 83–6
 - emotions: extinction-induced emotional behavior 179
 - Pavlovian conditioning of 89
 - verbal behavior and 399–400, 400f
- empirical evidence 12–13
- environmental events 16–17
- Environmental Protection Agency 29–30
- escape behavior 271
- escape extinction 171–3, 172f, 173f, 182, 187
- establishing operations (EOs) 232–3, 232f
 - defined 232–3, 232f
 - examples of 233
- event recording 36–8
- calculating IOA when using 37–8, 37t, 38t
- defined 36
- when to use 35f, 37
- experimental analysis of
 - behavior: components of 26–7
 - conditioned reinforcer 208–10, 210f
 - correlation separated from causation in 25–6
 - dependent variable, behavior as 26
 - falsifiable hypothesis 26
 - manipulation of the independent variable 26–7
 - operant extinction 183
 - problem-box experiment 130, 131f
 - puzzle-box experiment 127–30, 128f, 129f
 - scientific method 12–14
 - scientists in 17–18
- experimental designs in behavior analysis 47–79
 - alternating-treatments design 55–7, 56f
 - comparison (A-B) design 52–3, 53f, 54f
 - group experimental designs 49–50
 - multiple-baseline design 57–61, 58f, 60f, 61f
 - reversal (A-B-A) design 54–5, 55f
 - single-subject experimental designs 51–7
- extinction, operant *see* operant extinction
- extinction, Pavlovian 103–8, 105f, 106f
- extinction burst 179–80
- extinction-induced emotional behavior 179
- extinction-induced resurgence 179, 181–2, 182t
- extinction-induced variability 179, 180–1, 181f
- extrinsic reinforcers 158–9
- fade/fading 342–3, 394
- falsifiable hypothesis 26
- falsifiable predictions 13
- Fantino, E. 209–10, 210f
- FCT *see* functional communication training
- fear conditioning, Pavlovian 90–2
 - Little Albert experiment 90–2, 91f
 - PTSD in military veterans 92
- Ferguson, D. L. 214
- Ferster, C. B. 275, 290–1, 294f, 297f, 302, 303, 304f, 306f
- Feynman, Richard 12
- fight-or-flight response 93, 94
- FIT Game 138
- fixed-interval (FI) schedules 302–4, 302f
 - defined 302
 - examples of 302–3, 303t
 - typical pattern of responding under 303, 304f
 - visual representation of 302f
- fixed-ratio (FR) schedules 292–5, 293t
 - cumulative record in 292–4, 293f
 - defined 292
 - examples of 292, 293t
 - post-reinforcement pause in 294–5
- post-reinforcement procrastination in 295
- typical pattern of responding under 294, 294f
- visual representation of 292f
- flow: defined 215–16
- shaping and 215–17
- Ford, E. W. 26–7, 34
- forward chaining 341
- free will 7, 14
- frequency 32
- functional analysis of behavior 184–7, 267
 - defined 184–5
 - operant extinction and 184–6, 185f
 - to positively influence behavior 184–6, 185f
 - results of 185–6, 185f
 - self-injurious behavior and 186–7
- functional-communication training 311
- functional variables: antecedent stimuli to identify 322
 - behavior influenced by 10
 - causes distinguished from 7
 - choices influenced by 9, 351, 372, 373
 - defined 5, 24
 - experiments to identify 23, 47, 52
 - matching equation to identify 368
 - motivation and 231, 235
- games for good 137–138
- Gazzaniga, Michael 10
- generality, in applied behavior analysis 19
- generalization 334–44
 - defined 334
 - discrimination training to improve stimulus control 336–7, 337f
 - generalization gradient 335, 335f
 - maintenance and, promoting 337–9
 - Pavlovian 101–3, 102f, 103f
- generalization gradient 101–3, 102f, 335–7, 335f, 336f, 337f
- generalized conditioned reinforcer 207
- General Medical Council 403–4
- Goldilocks zone 216–17, 218, 270–1
- Good Behavior Game 205, 276
- Gore, Al 236
- graduated exposure therapy 104–5
- Green, L. 379
- group experimental designs 49–50
- habits 248–52
 - defined 248–9
 - everyday 250
 - formation of 249–50, 249f
 - replacing bad habits with good habits 250–2
- habituation 85
- Hart, Carl 368
- Hayes, S. C. 404, 409
- Herrnstein, R. J.
 - Herrnstein's equation 357–62, 359f, 360f, 361f
 - matching equation 358–72 (*see also* matching law/ equation)

- operant learning experiments on
 - choice 354, 357–62
 - Response-Strengthening Theory 163
 - two-factor theory 150–1
- heuristics, in reinforcement 153
- Hidden Brain* (podcast) 212
- Hineline, P. N. 151, 152
- Hoffman, Phillip Seymour 132
- human behavior, shaping 215
- humors, theory of 11
- hyperbola 375, 381
- idealized cumulative records 306, 307f
- immediacy: punisher 266–9
- reinforcer 246–8, 247f
- impulsive choice 372–80
 - commitment strategies 378–9, 379f
 - defined 372
 - delay-exposure training 380
 - examples of 373, 374t
 - influencing 377–80
 - predicting 373, 375–6, 375f, 376f
 - preference reversals, predicting 376–7, 377f
 - steeply discounting value of future consequences 377–8, 378f
- impulsivity 356, 372–80
- incorrect rules, persistently following 403–5
- independent variables:
 - defined 13
 - manipulation of 26–7; *see also* experimental designs in behavior analysis
- individual behavior 1–2
 - inferential statistics: for identifying behavior change 64
 - in visual analysis of behavior change 75–6
- Information Theory of Reinforcement 163–4
- Inside Out* (movie) 9
- instrumental behavior 130
- intermittent reinforcement 178, 290, 311
- internal validity 51–2
 - interobserver agreement (IOA):
 - accuracy differentiated from 31
 - in behavioral definitions 30–1
 - benefit of 31
 - defined 30
 - levels of, acceptable/unacceptable 31
 - reliability differentiated from 31
 - formula for 30
 - what it is not 30
 - when using duration recording 41, 42t
 - when using event recording 37–8, 37t, 38t
 - when using interval recording 40, 40t
 - when using outcome recording 35, 36t
 - when using partial- or whole-interval recording 40, 40t
- inter-trial intervals (ITIs) 203f
- interval recording 39–40
 - calculating IOA when using partial- or whole- 40, 40t
 - defined 39
 - partial 39–40, 40t
 - when to use 35f, 39–40
 - whole 39–40; *see also* partial-interval recording; whole-interval recording
- interval schedules of reinforcement 302–6
 - fixed-interval (FI) schedules 302–4, 302f
 - variable-interval (VI) schedules 304–6
- intraverbal 393
- intrinsic motivation 157–8
- irreversible effect 57

- maladaptive pliance 408
- maladaptive tracking 408
- mand 392
- marking 208
- matching law/equation 358–72
 - attention and 370–1
 - overview 357–8
 - to positively influence behavior 368–70, 369t, 370t
 - research support for 361–2, 361f
 - substitute reinforcers and 366–8
 - terrorism, white nationalism and 364–6
 - uncertainty in 358–60, 359f, 360f, 361f
- mentalistic explanations of behavior: cost of mentalistic reasoning 236–7
 - examples of 7–10
 - rejecting 230–1
- military veterans, PTSD in 92
- milk let-down reflex 84
- Mineka, S. 152
- Moro reflex 83–4
 - motivating operations (MOs):
 - abolishing operations (AOs) 232f, 233–4
 - establishing operations (EOs) 232–3, 232f
 - kinds of 232–4, 232f
 - punishment and 254n
 - response-reinforcer contingency learning in 234–5
 - therapeutic utility of 235–6
- motivation: everyday concepts of 230–1, 231f
 - motivating operations (MOs) and 232–7
 - and operant extinction 175
- multi-element design *see* alternating-treatments design
- multiple-baseline design 57–61, 58f, 60f, 61f
 - defined 57
 - multiple-baseline across-behaviors design 57–9, 58f
 - multiple-baseline across-participants design 60, 61f
 - multiple-baseline across-situations design 59, 60f
 - replication, kinds of 62–3
- multiple-exemplar training 397–8, 397f

- Nagel, Thomas 343
 natural selection 201
 nature (behavioral determinants) 15–17
 “nature vs nurture” debate 85
 negative punishment 261f, 263–4, 263f
 negative reinforcement 146–52
 avoidance (SR_A-) 148–52
 escape (SR_E-) 146–8
 heuristics in 154
 loss aversion in 154
 operant extinction following
 (escape extinction) 171–3, 172f, 173f
 to positively influence behavior 155–6
 positive reinforcement compared to 153–5
 preference for positive reinforcement 155
 in workplace 156–7
 negative reinforcement – avoidance (SR_A-) 148–52
 consequence in 150–1
 defined 148
 examples of 149
 in lab 150
 SR_E- compared to 148–9
 negative reinforcement – escape (SR_E-) 146–8
