

# SUBJECT INDEX

## A

- ABAB experiment, 51
- Abstinence education, 540–1, 540t
- Accommodation, 26, 273
- Active gene–environment association, 106
- Adaptive behaviors, preparedness for social interaction and, 90
- Adolescents standing trial as adults, 459–60
- Adoption, 281–2
- Adoption and Safe Families Act (ASFA), 552
- Adoption studies, 100–2, 106, 486, 489
- Adult Attachment Interview (AAI), 146, 154
- Affect Knowledge Test, 202
- African American children
  - aggressive behavior of, 479–80, 490
  - drug use and, 109
  - early childhood education for children in poverty and, 527
  - ethnic identity and, 220–5
  - parent–child interactions and, 66
  - physical appearance and peer status and, 313
  - prejudice against, 236
  - preverbal communication and, 239–40
  - racial integration in schools and, 359
  - smiling rates of, 171–2
  - suicide rates among, 198
  - teacher–student relationships of, 355
  - violence in, preventing, 513
- Age cohort, 35, 54, 55
- Aggression, 476–517. *See also* Bullying
  - abusive parents and, 490
  - adaptive/maladaptive functions, 33, 118, 249, 309, 312, 462, 478
  - brain and, 488
  - child soldiers and, 493–5
  - coercion model of, 490–1
  - combined biological and social influences on, 497–9, 499f
  - cultural determinants of, 495–6
  - developmental changes in, 20, 479–80, 479t, 516
  - deviancy training, 492
  - environmental triggers of, 499–500, 500f
  - gender differences in, 16, 481–3, 482f, 517
  - genetics and, 486–7, 499–500, 500f
  - hormonal contributions to, 488
  - indirect aggression, 478, 478t, 503
  - individual differences, 34, 483–4, 516
  - neighborhood influences on, 492–3, 495, 495f
  - neurological correlates of, 487–8
  - parents' as providers of opportunities for, 491
  - parents' influence on, 489–90
  - peer influences on, 491–2
  - prenatal conditions and, 488–9
  - sociocognitive factors in development of, 500–2
  - stability, 479, 483–4
  - temperament and, 487
  - types of, 477–8, 478t
  - violence in electronic media and, 496–7
- Aggression, control of, 508–14
  - by catharsis (letting off steam), 508
  - by cognitive modification strategies, 509
  - multifaceted approach to, 510
  - parents as agents for, 509–10
  - schools as venue for intervention, 510
- Aggression, determinants of
  - combined social and biological influences, 497–9, 499f
  - cultural determinants, 513
  - hormonal influences, 479t
  - mass media influences, 489
  - neighborhood influences, 30, 480, 489, 492–3, 495, 495f, 500
  - neurological influences, 487–8
  - parental influences, 489–90
  - peer influences, 478, 489, 491–2
  - prenatal conditions, 488–9
  - sociocognitive factors, 500–2
  - temperamental influences, 487
- Aggression, theories of
  - biopsychological model, 486
  - coercion model, 490–1
  - social information processing model, 501, 502
  - transactional model, 486, 486f
- Aggression, types of
  - direct aggression, 478, 478t, 503
  - hostile aggression, 477, 479, 479t, 516
  - indirect aggression, 478, 478t
  - instrumental aggression, 477, 479t, 516
  - physical aggression, 477, 478t
  - proactive aggression, 477
  - reactive aggression, 477
  - relational aggression, 477, 478t

- Aggression, types of (*continued*)  
 social aggression, 478  
 verbal aggression, 477, 478t
- Aggressive-rejected children, 309
- Alleles, 104, 112
- Alpert, Phillip, 381
- Altruistic behavior, 461–70, 463t. *See also* Prosocial behavior
- American Academy of Pediatrics, 364
- American family, changing, 276–93  
 adoption, 281–2  
 divorce, 284–93  
 gay and lesbian parents, 282–3  
 parenting after thirty, 280  
 parenting alone, 283–4  
 remarriage, 290–3  
 reproductive technologies, new, 281  
 work stress and children's adjustment, 279  
 working mothers, 277–9
- American Psychological Association Task Force on the Sexualization of Girls, 367
- Amygdala, 91, 97, 97f, 98, 403
- Analyses of variance (ANOVA), 74
- Androgynous, 425–7
- Anger, 177–8
- Anger recognition, 183
- Anterior cingulate cortex (ACC), 97, 97f
- Anterior insula (AI), 97, 97f
- Anxious-ambivalent attachment, 138
- Approach-avoidance behavior, 144
- Asian American children, 210, 222, 227
- Assimilation, 26
- Assisted reproductive technique, 112
- Associative play, 301, 301t
- Attachment, 127–61  
 to caregiver, 142–4  
 consequences of (*See* Attachment, consequences of)  
 cultural differences in, 140  
 defined, 127  
 development of, 132–5, 133t  
 to fathers, 135, 142  
 to grandparents, 134  
 hormones supporting attachment, 145  
 infant characteristics and, 150–1  
 infants' attachment development, parents' role in, 141–50  
 in the making phase, 133t  
 maternal bonding and, 131–2  
 to mother, 134, 141  
 mothers in prison and, 149–50  
 to objects, 135  
 in older children, 153  
 parent's input into (*See* Attachment, parents' input into)  
 representation, 146  
 to siblings, 134  
 stability of, 151–61  
 theories of, 128–32  
 types (*See* Attachment types)
- Attachment, assessing  
 Attachment Q-Set (AQS), 139, 139t  
 Adult Attachment Interview (AAI), 146, 154  
 California Attachment Procedure (CAP), 140  
 coding children's behavior, 138  
 in different cultures, 140  
 Strange Situation Procedure, 140
- Attachment, consequences of, 153–61  
 in exploration and cognitive development, 153–4  
 in later development, 156–7  
 in self-esteem, 156  
 in social development, 154–6, 155f
- Attachment, parents' input into, 141–50  
 biological preparation for, 141–2  
 caregiving and, 142–4  
 children in child care and, 148–50  
 continuity in, 146–7  
 family and community contexts and, 144–6  
 mothers in prison and, 149–50
- Attachment Q-Set (AQS), 139, 139t
- Attachment types, 136–41, 137t  
 Ainsworth's classification of, 136–8  
 brain and, 141  
 insecure–ambivalent (resistant) attachment (Type C), 137t, 138  
 insecure–avoidant attachment (Type A), 137t, 138  
 insecure–disorganized attachment (Type D), 137t, 138  
 in institutionalized children, 144t  
 association between mother's and children's, 147t  
 secure attachment (Type B), 137t, 138
- Attention-deficit/hyperactivity disorder (ADHD), 109, 115
- Attrition, 54
- Attunement, 89
- Auditory (hearing) preparedness, 85, 87–8
- Authoritarian parenting, 255, 257, 258t, 272, 274
- Authoritative parenting, 256, 258t, 274, 288, 304, 448
- Autism, 110–11, 211, 229–31
- Autism spectrum disorder (ASD), 110–11, 211
- Autonomous adults, 146, 147t
- Average children, based on sociometric evaluation, 308
- Avoidance, 18, 117, 138, 144, 236, 322
- Axon, 94
- B**
- Babbling, 105, 173, 240
- Baby and Child Care* (Spock), 8, 67
- Baltimore Study of Teenage Motherhood, 538
- Becoming a Family project, 253
- Beeper (experience sampling) method, 62
- Behavior genetics, 100–2  
 adoption studies and, 100–2, 106  
 shared/nonshared environments and, 102  
 twin studies and, 100–2
- Benjamin, Spock, 67
- Biological foundations for social development, 85–123  
 genetic, 99–103  
 neurological, 90–8

- for social interaction, 86–90
  - temperament, 113–23
  - Biological perspectives, 31–5
    - ethological theory and, 30f, 31–2
    - evolutionary developmental theory and, 32–3
    - human behavior genetics and, 34–5
  - Biological preparedness, 86–90
    - auditory (hearing) preparedness, 85, 87–8
    - biological rhythms, 86
    - gustatory (taste) preparedness, 88–9
    - olfactory (smell) preparedness, 88–9
    - social rhythms, 86
    - tactile (touch) preparedness, 88–9
    - visual preparedness, 86–7
  - Biological rhythms, 86
  - Biopsychological model, 486
  - Biracial and bicultural children and youth, 223–4
  - Bloods (gang), 339
  - Brain, 91–8
    - aggression and, 488
    - attachment types and, 141
    - cerebral cortex, 91, 91f
    - experience-dependent processes, 95
    - experience-expectant processes, 95
    - growth and development, 91–2, 95
    - hemispheric specialization and, 93–4
    - mirror neurons and, 95–8
    - neurons and, 94–5
    - social brain, 95–8
    - structure and gender typing, 402–4, 403f
    - synapses and, 94–5
  - Brain imaging techniques. *See* Psychophysiological techniques
  - Brown, Brooks, 319
  - Bucharest Early Intervention Project, 49
  - Bullying, 502–8
    - behavior of bullies and, 503–5
    - conditions leading to, 507–8
    - consequences of, 505, 507
    - cyberfighting and cyberbullying and, 505–6
    - Megan Pledge and, 506
    - victimization, 504
- C**
- California Attachment Procedure (CAP), 140
  - Canalization, 105
  - Carnegie Foundation, 349
  - Carolina Abecedarian Project, 527
  - Case study, 51–2
  - Catharsis, 508
  - Ceausescu, Nicolai, 49
  - Cells to Society (C2S): Center on Social Disparities and Health, 554
  - Center care, 529
  - Cerebral cortex, 91, 91f
  - Cerebral hemispheres, 93, 403
  - Cerebrum, 91
  - Changes over time, research methods for, 52–6
    - comparison of methods, 56t
    - cross-sectional design, 52, 56f
    - cross-sequential design, 55–6, 56f
    - longitudinal design, 52–6, 53f, 56f
  - Child Abuse Prevention and Treatment Act (CAPTA), 552
  - Child abuse within the family, 543–53
    - aggression and, 490
    - child neglect, 544–5
    - children's rights and, 547–8
    - consequences of, 546–7
    - death as a result, 543, 543f
    - ecology of, 545–6
    - federal and state policies for, 551–3
    - intergenerational cycle of abuse, 545
    - interrogations and legal policy suggested for, 551–2
    - peer rejection and, 323–4, 324f
    - physical abuse and, 490, 497, 507, 543–4
    - preventative programs for, 548–51
    - sexual abuse, 544
    - statistics on, 543
  - Child care, 528–31
    - quality of, 530–1, 530t
    - social policy needed for, 531–4, 532f
    - time in, 531
    - types of, 529
  - Child neglect (and abuse), 544–5
  - Child Protective Services (CPS), 553
  - Child rearing patterns, 273–6, 275f
  - Child Soldiers Global Report, 493
  - Childhelp National Child Abuse Hotline, 550
  - Childhood depression, 197–201
    - biological foundations of, 200
    - cognitive correlates of, 201
    - cultural roles in, 198
    - diagnosing, 198
    - social causes of, 200–1
    - suicide and, 199
    - treating, 201
  - Children's Institute International (CII), 551
  - Chorionic villi sampling, 112
  - Chromosomes
    - behavior genetics and, 34–5, 99
    - gender identity and, 401, 404
    - genetic anomalies and, 108–13, 281
    - models of genetic influence and, 104
    - prosocial behavior and, 465
    - X chromosomes, 108, 404
    - Y chromosomes, 108, 404
  - Chronosystem, 30f, 29, 276
  - Classical conditioning, 20
  - Clear-cut attachment phase, 133t
  - Clinton, Bill, 552
  - Cliques, 298, 319, 336, 480, 562
  - Coding, 70, 103, 138, 169f, 321
  - Coercion model of aggression, 490–1

## 612 Subject Index

- Cognitive behavior therapy, 201, 460
- Cognitive development perspectives, 26–9
  - cognitive developmental theory and, Piaget's, 26, 27t
  - social cognitive domain perspective and, 27–8
  - sociocultural theory and, Vygotsky's, 28
- Cognitive developmental theory of gender typing, 406
- Cognitive developmental theory, Piaget's
  - attachment and, 129–30
  - cognitive developmental perspectives and, 26, 27t
- Cognitive factors in gender typing, 405–8
  - multischematic gender typing, 429
- Cognitive learning perspectives, 21–5
  - cognitive social-learning theory, 21–2
  - evaluating, 24
  - reciprocal determination and, 22–4, 23f
  - self-efficacy and, 22–4
- Cognitive modification strategies, 509
- Cognitive social learning theory, 21–2, 408, 466
- Cognitive theory of moral judgment, Kohlberg's, 435–42, 436t, 437f
  - levels and stages in, 435–7, 436t, 437f
  - limitations of, 438–9
  - study of moral development revised and expanded from, 439–41
- Cognitive theory of moral judgment, Piaget's, 433–5
  - evaluation of, 434–5
  - stages of moral reasoning in, 433–4
- Collective efficacy, 24, 347
- Collective self, 207
- Columbine massacre, 319
- Communication, 239–45. *See also* Language
  - babbling, 240
  - cooing, 240
  - critical listening skills and, 243
  - phonological processing and, 403
  - preverbal, 239–40
  - semantic development of, 241
  - speech adjustment and, 242–3
  - telegraphic speech and, 241
- Comprehensive sex education, 540–2, 558
- Conscience
  - defined, 451
  - in Kohlberg's theory of moral development, 436t
  - moral behavior and, development of, 451–2, 460, 493
  - self-regulation and, 451
  - socialization and, 255
  - superego, 16
  - temperament, 118
- Constructs, 44, 70, 75, 209, 472
- Contact maintenance, 138
- Controversial children, based on sociometric evaluation, 308
- Convention on the Rights of the Child (CRC), 547
- Conventional level of moral development, 435, 436t, 437f
- Cooing, 240
- Cooperative learning, 220
- Cooperative play, 301, 301t
- Coparenting
  - cooperative, 264, 289
  - defined, 264
  - hostile, 264
  - imbalanced, 264
- Corporal punishment, 275, 547
- Corpus callosum, 93
- Correlation, 45–6, 74, 106, 151, 404, 465, 478
- Cortisol, 73, 145
- Couple system, 249–53
  - children and, affect on, 249–50
  - new baby and, impact of, 252–3
  - overcoming problems, 252
  - parents fight, 250–2
- Crips (gang), 339
- Critical period, 31, 130. *See also* Sensitive period
- Cross-sectional design, 52, 56f
- Cross-sequential design, 55–6, 56f
- Crowds, 336
- “Cuddle” hormone (Oxytocin), 145
- Cyberbullying, 505–6
- Cyberfighting, 505–6
- D**
- Daniel Tiger's Neighborhood*, 365
- Darfur, genocide in, 238
- Data analyses, 74–6
  - analyses of variance (ANOVA), 74
  - correlation, 74
  - mediation, 75
  - path analysis, 75, 75f
- Data collection methods, 61–74, 64f, 72t, 73f
  - direct observations, 66–9
  - eavesdropping techniques, 68
  - ethnography, 70–1
  - event sampling, 70
  - experience sampling method (ESM) and ecological momentary assessment (EMA), 61, 64f, 79
  - focus groups, 65–6, 70
  - interviews, 62, 65, 70, 74
  - observer/interview bias, 68
  - puppet interviews, 62
  - questionnaires, 62, 65
  - reactivity issues, 68
  - self-reports, 61–4
  - specimen record, 70
  - structured diaries, 65
  - structured observation, 69
  - surveys, 64, 70
  - time sampling, 70
- Debriefing, 77
- Deception, 47, 77, 230, 456, 573
- Delay of gratification, 117, 451
- Dendrites, 94
- Dependent variable, 47, 50, 51
- Depression. *See* Childhood depression

- Desensitization, 21, 366, 375, 497
- Deviancy training, 492
- Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*, 500
- Diathesis–stress (or dual-risk) interaction model, 107
- Differential susceptibility model, 107
- Diffusion, identity, 217t, 218
- Direct aggression, 478, 478t
- Direct observations
- defined, 66
  - naturalistic observation, 66–8
  - structured observation, 69
- Dismissing adults, 147, 147t
- Divorce, 284–93
- custody of children and, 289–93
  - effects of, 285–6
  - remarriage and, 290–3
  - single-parent household and, 288–9
- Dizygotic twins, 101
- DNA
- autism and, 111
  - markers, 103
  - microarrays, 103
  - substance abuse predicted by, 109
- Domain specificity, 28
- Dominance hierarchy, 335
- Dreams from My Father* (Obama), 223
- Drive reduction theory, 20, 129
- Duchenne smiles, 171, 173, 183
- Duplay smiles, 172f, 173
- E**
- Early Head Start, 524
- Early starters, 484, 498
- Eavesdropping techniques, 68
- Ecological theory, 29, 30f
- Ecological validity, 47, 48, 51, 69
- EEG (electroencephalography), 72, 72t, 73f
- Effect size, 59, 285, 486
- Ego, 16, 18
- Egocentric, 26, 181, 232, 233t, 322
- Electra complex, 16
- Electronic media, 364–75. *See also* Internet
- aggression from violence in, 496–7
  - children’s understanding of, 369–72, 370t, 372f
  - gender typing and, social influences on, 416
  - modifying negative effects of, 372–3
  - playing video games, 374–5
  - screen media, 364–9
  - used by adults, 373–4
- Emotional competence, 193, 196–7, 202, 459
- Emotional development, perspectives on, 166–8
- biological, 167
  - functional, 168
  - learning, 167
- Emotional development, problems in, 197–203. *See also* Childhood depression
- Emotional display rules, 170t, 185, 188, 204
- Emotional expressiveness
- individual differences in, 181–2
  - in infancy and early childhood, 170t
- Emotional regulation, 188–9, 192
- Emotional scripts, 185–6
- Emotional socialization, 189–97, 191f
- model of, 191f
  - by parents, 191–4
  - by peers and siblings, 194
  - by teachers, 195–6
- Emotional understanding, 182–8
- of cultural differences, 184–5
  - of recognizing emotions in others, 182–5
  - in understanding about emotions, 185–8
- Emotions, 165–203. *See also* Primary emotions; Secondary emotions
- defined, 166
  - development of, 168–82
  - importance of, 166
  - moral (*See* Moral emotions)
- Empathic reasoning, 463
- Empathy
- defined, 180
  - perspective taking and, 469–70
- Enron Corporation, 453
- Entertainment Software Association, 374
- Epigenetics, 105
- Epistasis, 104
- Equifinality, 12
- Ethnic identity
- biracial and bicultural children and youth, 223–4
  - defined, 220
  - development of, 220–3
  - faces of, 220t
  - factors that promote, 224–5
  - types of, 224f
- Ethnography, 70
- Ethological theory, 30f, 31–2, 130–2
- Event sampling, 70
- Event-related brain potentials (ERP), 229
- Evocative gene–environment association, 106
- Evolutionary developmental theory, 32–3
- Evolutionary theory, gender development and, 400–1
- Exosystem, 29
- Experience sampling method (ESM) and Ecological Momentary Assessment (EMA), 61, 64f, 79
- Experience-dependent processes, 95
- Experience-expectant processes, 95
- Experimental methods
- field experiments, 48–50
  - interventions, 48–9
  - lab-and-field experiments, 50–1
  - laboratory experiments, 46–8
  - natural experiments, 49–50
- Expressive characteristics, 392

## 614 Subject Index

Extended family, 30f, 265, 274, 276, 514, 528, 562, 563, 574  
Externalizing problems, 118, 155, 267, 291, 372, 492

Family systems

coparenting system, 264–5

couple system, 249–53

defined, 249

family mealtimes across developmental periods, 272t

parent–child system, 254–64

sibling system, birth order and, 265–70

stories, rituals and routines in, 270–2

Fast Track Project, 511

Fatherhood and generativity, 19

Fathers

absence of, gender typing and, 413, 415–16

attachment to, 135, 142, 156–7

biological preparation for fatherhood and, 142

divorced, 289

in parent–child system, 261–4

teenage, problems for, 537–8

transition to fatherhood and, 253

Fear, 174–7

phases of, 174

reactions to, changes in, 177

separation anxiety, 177

social referencing and, 176

stimuli causing, 177t

of strangers, 174, 175f, 175t

Female brain, 402

Field experiments, 48–50, 566

5-HTT (serotonin transporter) gene, 109

Florida Child Care Quality Improvement Study, 534

Focus groups, 65–6, 70

Foreclosure, identity, 217t, 218

Foster care, attachment and, 131, 133, 144, 149–50

Fragile X syndrome, 108

Fraternal twins, 101

Friendship, 326–32

changes in, age and, 326–9, 327t

earliest, 326–7

expectations in, changing, 328–9, 328t

goals in, 327–8

interactions in, 329–31

love and protection in, 330

patterns, 331–2

pros and cons of, 332

romantic, 332–4

Frontal cortex, 91

Frontal insula (FI), 97f, 98

Functional magnetic resonance imaging (fMRI)

example of, 73f

explained, 72, 72t

to study attachment types, 141

to study brains of lactating mothers, 263

to study children exposed to violent video games, 497

to study facial recognition, 87

to study mirror neurons, 96

to study theory of mind, 229

to study uncomfortable feeling of physical pain, 316

### G

peer interaction and, 418, 420–2

summary of, 414t

Gender segregation, 303, 304, 420–1

Gender stability, 389, 406, 408, 414t

Gender stereotypes

in children's literature, 417

cultural differences in, 414t

defined, 389

in girls *vs.* boys, 392

modeling parents' characteristics and, 413

prosocial behavior and, 464

stability and, 393

Gender typing

defined, 388

development of, 414t

sex differences in, 395

stability of, 393

summary of, 414t

- Gender typing, biological factors in, 398–405  
 brain structure and, 402–4, 403f  
 evolutionary theory and gender development and, 400–1  
 genetics of gender and, 404  
 hormones and social behavior and, 401–2  
 prenatal androgens, 402
- Gender typing, cognitive factors in, 405–8  
 cognitive developmental theory of gender typing  
 and, 406–7  
 gender-schema theory and, 407–8
- Gender typing, social influences on, 408–25  
 books and television and, 417–18  
 computers and, 419–20  
 father absence and, 413, 415–16  
 gender segregation, 420–1  
 nature and nurture, 425  
 parents' behavior with infants and toddlers, 410–11  
 parents' behavior with older children, 411–12  
 parents' characteristics, modeling, 413  
 parents' influence on, 409–10  
 schools and, 422  
 siblings and, 416–17  
 social cognitive theory of gender development and, 408–9  
 social structural theory of gender roles and, 409  
 teachers and, 422–3, 424t, 425
- Gender-role preferences, 389
- Gender-schema theory, 407–8
- Gene by environment ( $G \times E$ ) interaction models, 106–8, 107f
- Gene expression, 104–5, 105f
- Gene interactions, 104
- Gene makeup, 105–6
- Gene–environment feedback loops, 108
- Geneline therapy, 113
- Generativity, 17t, 18, 19
- Genes  
 aggressive behavior and, 499–500  
 defined, 99  
 modifier, 104  
 potential determined by, 99
- Genetic anomalies, 108–13  
 ADHD, 109  
 autism, 110–11  
 chorionic villi sampling and, 112  
 fragile X syndrome, 108  
 Turner syndrome, 108  
 Williams syndrome, 109
- Genetic foundations for social development, 99–103  
 genetic anomalies and, 108–13  
 models of, 103–8  
 studying, methods of, 100–3  
 temperament, 113–23
- Genetic influence, models of, 103–8  
 for gene by environment ( $G \times E$ ) interactions, 106–8, 107f  
 for gene expression, 104–5, 105f  
 for gene interactions, 104  
 for gene makeup, 105–6  
 for gene–environment feedback loops, 108  
 for transmission of traits, 104
- Genetic markers, 112
- Genetic studies, 100–3  
 biological, 100–2, 108  
 molecular, 102–3
