 Publication Manual (PubMan), 55, 395, 396
 style checklist for empirical research reports, 409
 writing style, 395–396
 analogy test (ANA), 328
 analysis of variance (ANOVA), 115, 255–257, 334, 360
 anecdotal evidence, 20, 74–75
 Animal Enterprise Protection Act (1992), 47
 Animal Enterprise Terrorism Act (2006), 47
Animal Intelligence (Romanes), 74
 animals
 caring for, 52
 ethical guidelines for research with, 47–53
 in psychological research, 49–51
 rights, 47–49
 sentient, 49
 using for educational purposes, 52–53
 Animal Welfare Act 1966 (AWA), 51
 ANOVA. *see* analysis of variance (ANOVA)

ANOVA source table, 211
 anthropomorphism, 294
 anthrozoology, 50
 antivivisection, 48–49, 192
 anxiety, 111, 140, 141, 153–155, 164–168, 328
 APA. *see* American Psychological Association (APA)
APA Publication Manual (PubMan), 55, 395, 396
 application, 23
 applied behavior analysis, 370–380
 applied research, 80–81, 286
 applied psychology in historical context, 332–336
 design challenges in, 337
 design types, 338–348
 methods, 332–337
 apprenticeship model, 77
 archival data, 325–329, 350
 analysis, 328–329
 translational research using, 327
 archival research, 324
 archival data, 325–329
 meta-analysis, 329–332
 artifact collection, 314
 assent, 40
 Association for Psychological Science (APS), 330, 410
 Association of Internet Researchers, 45
 ataxic dysarthria, 385
 attention deficit hyperactivity disorder (ADHD), 372
 attrition, 157, 177
 authority, 5
 autism spectrum disorder (ASD), 330
 autoethnography, 383
 availability heuristic, 6, 7, 10, 350

B

Balloon Analogue Risk Task—Youth version (BART-Y), 244, 245
 bar graph, 206
 Barnum effect, 20
 basic time-series design, 346–348
 Beck Depression Inventory (BDI), 91

Beck Depression Inventory-II, 266
 BED-PRO intervention, 215
 bedtime procrastination (BP), 215
 behavioral measurement, 99–103
 behavioral research, 50
 behavior checklists, 310
 Behaviorist Manifesto, 12
 belief perseverance, 6
 Belmont Report, 32, 37
 Beneficence, 32
 between-subjects design, 163
 challenges in applied research, 337
 creating equivalent groups, 164–169
 matching procedure, 166–169
 multilevel designs, 202–204
 random assignment, 164–166
 single-factor designs, 194–197
 bias
 confirmation, 6
 experimenter, 180–182, 196, 274, 303, 313
 interviewer, 303
 nonresponse, 274
 observer, 309–310
 participant, 183–188
 publication, 124
 researcher, 326
 self-selection, 265, 273
 social cognition, 6–8
 social desirability, 275
 bias-free language, 398–399
 Bifidobacterium probiotic (B-pro), 183
 big data, 325, 328
 bivariate approach, 285
 blocked random assignment, 165, 183, 187
 block randomization, 175–176, 252
 Bobo doll studies, 144–146
 bystander effect, 67, 202

C

carryover effect, 171–172, 272
 case study
 designs, 382–387
 evaluation, 387–388
 ceiling effect, 140, 238, 339
 Center for Disease Control (CDC), 376

- Central Intelligence Agency (CIA), 38
centrifugal swing, 64
challenging behavior, 379
changing criterion design, 376
child study movement, 264
Civil Rights Act (1964), 32
Clean Air Act, 271
Clever Hans case, 73–74
closed-or fixed-response questions, 301
closed question, 266–267, 277
cluster sampling, 97–98
Coca-Cola, 334
Code of Ethics, 30–33, 148–149, 188, 319
coefficient of determination, 282
cognition, 68–69
Cognition and Reality (Neisser), 150
cognitive development, stage theory of, 68
cognitive dissonance, 68, 70
cohort effects, 177
cohort sequential design, 178
Collaborative Institutional Training Initiative (CITI), 34
Columbia Bible, 133–134
communicating research, 395–412
communication skills, 393
community forum, 351
complete counterbalancing, 172–173
computer skills, 393–394
concept-learning, 364, 365
concept of length, 65
conceptual replication, 85, 126, 142, 167, 204, 278, 293, 330, 331
concurrent validity, 105
confederate, 82, 199, 202
confederate error, 203
confidence interval, 126–127, 206, 283–284
confidentiality, 41, 44, 355
confirmation bias, 6
confound, 137–139, 157–158
constructs, 64
 developing measures from, 99–102
 testing using habituation, 100–101
 testing using reaction time, 101–103
 validity, 106–107, 146–147
contact hypothesis, 165
content analysis, 326
content validity, 105
continuity theory, 364
continuous life-cycle of theory and research, 70
control groups, 136–137
convenience sample, 98
convergent validity, 106
converging operations, 65
correlation, 279–280, 329
correlation coefficients, 280–282
cost-benefit analysis, 354
cost-effectiveness analysis, 342, 354
counterbalancing, 172, 243, 334
 with block randomization, 175–176
 complete, 172–173
 mixed factorial with, 243–246
 partial, 173–174
 reverse, 174, 197
cover story, 199, 204
creative thinking, 62–64
criterion validity, 105
criterion variable, 283, 285
critical incidents technique, 30–31
critical thinking, 2, 3
cross-lagged panel correlation, 288, 289
cross-sectional study, 177
Cruelty to Animals Act (1876), 48
cumulative recorder, 367
- D**
data falsification, 55–57
data presentation, 205–209
debriefing, 43, 44, 46, 255
deception, 41–42
decision-making, 123, 125, 127, 353
decision tree, 193, 242
deduction, 69, 317
dehoaxing, 43
demand characteristics, 185–186
demographic information, 270
dependent samples, 210
dependent variable, 134, 139–140, 146
description, 22
descriptive statistics, 113–118, 277
desensitizing, 43
determinism, 9–10
dichotic listening, 80
directionality problem, 287–289
direct replication, 85, 126, 142, 277, 330, 331
discoverability, 9
discriminant validity, 106
discrimination reaction time (DRT), 102
DK alternative, 269
double-barreled question, 271
double-blind procedure, 182–183, 196, 327, 328, 334
dual-task studies, 89
Du Pont, 351
dysarthria, 385, 387
- E**
Ebbinghaus forgetting curve, 207–208
EBSCO, 87, 88
ecological validity, 150, 252
edge detectors, 67
effect size, 126, 329
effort justification, 20
empirical questions, 15, 64–79
empirical thinking, 392
