

SUBJECT INDEX

A

Aboriginal and Torres Strait Islander peoples, 246
Action stage of change, 76
Active Community Engagement (ACE) Continuum, 189
Active learning, 101, 109
 ACTs. *See* Artemisinin Combination Therapies
Actual control, 58–59
Advance care planning, 82–83
African American women, 95–96
Agenda-setting research, 223–224
Agent-based modeling, 30, 140
Alcohol, Smoking and Substance Involvement Test (ASSIST), 81
Allostatic load, 157
Alzheimer's disease (AD), 56
 research registries, 66–69
Artemisinin Combination Therapies (ACTs), 258
Artificial intelligence (AI), 5, 141
Associative network, 223–224
Attitudes, 41, 57–59, 61
Audience segmentation, 68, 276

B

Behavioral assessment, 244
Behavioral economics, 236
 applications, 265–267
 criticism, 268
 framework, 259
 historical development of, 261–262
 of nonadherence, 259
 opioid epidemic, 266–267
 for population health, 262–263
 standard economics to, 260–265
Behavioral intentions, 40, 60, 61
Behavioral science theories, 16
Behavior-specific ecological model, 32
Bidirectional interdependence, 27
Big data, 5
Bioecological approach, 157
Black, Indigenous, and other People Of Color (BIPOC), 175
Black-white racism, 177
Bowling Alone, 93
Break-it-Off (BIO) smoking cessation campaign, 295
Breastfeeding, 107
Brief intervention and contact (BIC), 128
Broaden-and-Build Theory of positive emotions, 159

C

Calvary Community Outreach Network, 184, 195
Canadian Cancer Society, 295

Cancer Prevention and Control Research Network, 204
Cancer-prevention HPV vaccine, 44
Cancer screening behavior, 47
Cardiovascular reactivity (CVR), 122
Catch My Breath (CMB) program, 109–111
CATCH programs. *See* Coordinated Approach to Child Health programs
CBPR. *See* Community-based participatory research
CDC's Guide to Community Preventive Services, 6
CEAL. *See* Community Engagement Alliance
Centralized networks, 144
“Central mechanism of behavior change,” 94
CHD. *See* Coronary heart disease
Chest X-ray, 45
Childhood obesity prevention, 178
Chronic diseases, 4
Chronic stressors, 161
Cigarette taxes, 261
Cisgender women, 65
Clustering, 144
Cochrane Collaboration, 6
Cognitive barriers, 104
Cognitive retention, 103
Cognitive social psychology, 223
Cognitive theory, 45
Collective efficacy, 94, 102
Collective empowerment, 191
Common-sense beliefs, 46
Communication theories, 18, 218–225
 for health, 220
 health equity, 224–225
 individual-level explanations of, 220–222
 planned and unplanned approaches, 219–220
 societal-level explanations of, 223–225
Community
 concept of, 185
 dimensions, 185
 Community and group models
 adaptation, 172
 collective well-being, 169
 multiple levels of influence and action, 171–172
 and organizational interventions, 170–171
Community-based participatory research (CBPR), 169–170, 184, 190–192
Community capacity, 187–188
Community empowerment, 188
Community engagement, 169, 170, 172
 application, 193–194
 benefits and challenges, 194–195
 CDC defines, 185
 community capacity, 187–188

Health Behavior: Theory, Research, and Practice, Sixth Edition. Edited by Karen Glanz,

Barbara K. Rimer, and K. Viswanath.
