Volume 1 Language Processing in the Brain: Basic Science

Contributors	xii
Preface	xxvi
Acknowledgments (personal)	xxxiv

Part I Language and Hemispheres: From Single-Word Recognition to Discourse

	1
1 Individual Differences in Brain Organization for Language <i>Christine Chiarello, Suzanne E. Welcome, and Christiana M. Leonard</i>	3
2 The Perceptual Representation of Speech in the Cerebral Hemispheres <i>Henri Cohen</i>	20
3 Mechanisms of Hemispheric Specialization: Insights from Transcranial Magnetic Stimulation (TMS) Studies <i>Michal Lavidor</i>	41
4 Understanding Written Words: Phonological, Lexical, and Contextual Effects in the Cerebral Hemispheres <i>Orna Peleg and Zohar Eviatar</i>	59
5 The Organization of Discourse in the Brain: Results from the Item-Priming-in-Recognition Paradigm <i>Debra L. Long, Clinton L. Johns, Eunike Jonathan, and Kathleen Baynes</i>	77

Part II Computational Modeling of Language

6 Connectionist Modeling of Neuropsychological Deficits in Semantics, Language, and Reading <i>Christine E. Watson, Blair C. Armstrong, and David C. Plaut</i>	103
---	-----

7	Neural Network Models of Speech Production <i>Matthew Goldrick</i>	125
8	Word Learning as the Confluence of Memory Mechanisms: Computational and Neural Evidence <i>Prahlad Gupta</i>	146
Part III Neural Correlates of Language Production and Comprehension		165
9	Neural Correlates of Semantic Processing in Reading Aloud <i>William W. Graves, Jeffrey R. Binder, Mark S. Seidenberg, and Rutvik H. Desai</i>	167
10	In a Word: ERPs Reveal Important Lexical Variables for Visual Word Processing <i>Chia-lin Lee and Kara D. Federmeier</i>	184
11	Hemodynamic Studies of Syntactic Processing <i>Peter Indefrey</i>	209
12	The Neurobiology of Structure-Dependency in Natural Language Grammar <i>Marco Tettamanti and Daniela Perani</i>	229
13	How Does the Brain Establish Novel Meanings in Language? Abstract Symbol Theories Versus Embodied Theories of Meaning <i>Dorothee Chwilla</i>	252
14	Motor and Nonmotor Language Representations in the Brain <i>Nira Mashal, Michael Andric, and Steven Small</i>	276
15	What Role Does the Cerebellum Play in Language Processing? <i>Kristina A. Kellett, Jennifer L. Stevenson, and Morton Ann Gernsbacher</i>	294
Part IV Coping with Higher-Level Processing: The Brain Behind Figurative and Creative Language		317
16	Bilateral Processing and Affect in Creative Language Comprehension <i>Heather J. Mirous and Mark Beeman</i>	319
17	Two-Track Mind: Formulaic and Novel Language Support a Dual-Process Model <i>Diana Van Lancker Sidtis</i>	342
18	Neuropsychological and Neurophysiological Correlates of Idiom Understanding: How Many Hemispheres are Involved? <i>Cristina Cacciari and Costanza Papagno</i>	368

- 19 Cognitive Neuroscience of Creative Language: The Poetic and the Prosaic 386
Seana Coulson and Tristan S. Davenport
- 20 The Brain Behind Nonliteral Language: Insights From Brain Imaging 406
Alexander Michael Rapp
- 21 Thinking Outside the Left Box: The Role of the Right Hemisphere in Novel Metaphor Comprehension 425
Miriam Faust

Part V The Multilingual Brain 449

- 22 Word Recognition in the Bilingual Brain 451
Ton Dijkstra and Walter J. B. van Heuven
- 23 Vocabulary Learning in Bilingual First-Language Acquisition and Late Second-Language Learning 472
Annette M. B. de Groot
- 24 What ERPs Tell us About Bilingual Language Processing 494
Judith F. Kroll, Taomei Guo, and Maya Misra
- 25 How the Brain Acquires, Processes, and Controls a Second Language 516
Jubin Abutalebi and Pasquale Anthony Della Rosa

Acknowledgments 539

Volume 2 Language Processing in the Brain: Clinical Populations

Part I Neuropsychology of Language: Methods and Paradigms 543

- 26 Potentials and Paradigms: Event-Related Brain Potentials and Neuropsychology 545
Marta Kutas, Michael Kiang, and Kim Sweeney
- 27 What the Speaking Brain Tells us About Functional Imaging 565
John J. Sidtis
- 28 Uncovering the Neural Substrates of Language: A Voxel-Based Lesion–Symptom Mapping Approach 582
Juliana V. Baldo, Stephen M. Wilson, and Nina F. Dronkers
- 29 Analytic Methods for Single Subject and Small Sample Aphasia Research: Some Illustrations and a Discussion 595
Hiram Brownell, Ken J. Hoyte, Tepring Piquado, and Arthur Wingfield
- 30 Verbal Fluency Tasks and the Neuropsychology of Language 619
Seija Pekkala

Part II Neuropsychology of Language: Language Loss	635
31 The Acquisition, Retention, and Loss of Vocabulary in Aphasia, Dementia, and Other Neuropsychological Conditions <i>Andrew W. Ellis</i>	637
32 Computational Neuropsychology of Language: Language Processing and its Breakdown in Aphasia <i>Stephen R. Welbourne</i>	661
33 Transcranial Magnetic Stimulation and Aphasia Research <i>Margaret A. Naeser, Paula I. Martin, Michael Ho, Ethan Treglia, Elina Kaplan, Errol H. Baker, and Alvaro Pascual-Leone</i>	679
34 Longitudinal Study of Recovery from Aphasia: The Case of Lexical Retrieval <i>Patricia Marinaro Fitzpatrick, Loraine K. Obler, Avron Spiro III, and Lisa Tabor Connor</i>	700
35 Multiple Languages in the Adult Brain <i>Mira Goral</i>	720
36 Clinical Neurolinguistics of Bilingualism <i>Andrea Marini, Cosimo Urgesi, and Franco Fabbro</i>	738
37 Sentence Comprehension in Healthy and Brain-Damaged Populations <i>Sonja A. Kotz, Kathrin Rothenrich, and Maren Schmidt-Kassow</i>	760
38 The Neural Basis for Aging Effects on Language <i>Deborah M. Burke and Elizabeth R. Graham</i>	778
Part III Neuropsychology of Language: Developmental Language Disorders	801
39 Neuropsychological and Neuroimaging Aspects of Developmental Language Disorders <i>Margaret Semrud-Clikeman and Jesse Bledsoe</i>	803
40 Specific Language Impairment: Processing Deficits in Linguistic, Cognitive, and Sensory Domains <i>Laurence B. Leonard and Christine Weber-Fox</i>	826
41 The Neurobiology of Specific Language Impairment <i>Richard G. Schwartz and Valerie L. Shafer</i>	847
42 Dyslexia: The Brain Bases of Reading Impairments <i>Ioulia Kovelman, Joanna A. Christodoulou, and John D. E. Gabrieli</i>	868
43 Acquired and Developmental Disorders of Reading and Spelling <i>Max Coltheart and Saskia Kohnen</i>	892

44	The Role of Anchoring in Auditory and Speech Perception in the General and Dyslexic Populations <i>Karen Banai and Merav Ahissar</i>	921
45	The Neurobiological Basis of Dyslexia: The Magnocellular Theory <i>John Stein</i>	938
46	Word Retrieval in Developmental Language Impairments: Application of the Tip-of-the-Tongue Paradigm <i>Katy Borodkin and Miriam Faust</i>	963
	Acknowledgments	983
	Index	985
