Foreword to the Second Edition	XXIII
Preface and Acknowledgements, First Edition	XXV
List of Figures	XXVII
List of Tables	XXXVII
Abbreviations, Acronyms, and Cell Lines	XLI

Volume 1: General Aspects, Microorganisms, Algae, and Fungi

Part 1 General Aspects and Documentary Resources

1	Systems of Classification of Living Organisms: Great Steps in Chemical and Biological Evolution	3
1.1	Whittaker's Five Kingdoms System (1959)	3
1.2	Discovery of Archaea: Ternary Model of Living Organisms	4
1.3	Characteristics of Cell Membranes	5
1.4	Some Recent Data on Terpenes	7
1.5	Main Stages of Evolution	7
1.6	Exceptional Resources of Marine Biodiversity	9
	Selection of Documentary Resources	10
	References	10
	Websites	11
2	General Information on the Marine Environment	13
2.1	Physicochemical Aspects	13
2.1.1	Chemical Composition of Seawater	13
2.1.2	Optical Properties of Seawater	15

2.2	Biological and Ecological Aspects	16
2.2.1	Primary and Secondary Metabolites	16
2.2.2	Ecomones: Vectors of Chemical Communication	16
2.2.3	Phenomena of Dependence	17
2.2.3.1	Dependence on Light	17
2.2.3.2	Dependence on Temperature	17
2.2.3.3	Dependence on Salinity	17
2.2.4	Main Types of Interspecific Relations	17
2.2.4.1	Commensalism	17
2.2.4.2	Symbiosis	17
2.2.4.3	Parasitism	18
2.2.5	The Hierarchy of Ecological Levels and Space Distribution of Marine Organisms	18
2.2.6	Plant Biodiversity: Phylogeny of the Algae	18
2.2.7	Animal Biodiversity	21
2.2.8	Biochemical Characteristics of Sessile Animals	23
2.2.9	Estimation of Biomass	23
	Selection of Documentary Resources	24
	References	24
	Websites	25
3	Chemistry of Marine Natural Substances: Originality, Diversity, Distribution	27
3.1	General Introduction	27
3.2	Distribution of Nitrogenous and Non-Nitrogenous Secondary Metabolites	27
3.3	Distribution of Secondary Metabolites by Chemical Class	28
3.4	Characteristics of the Secondary Metabolites of Marine Organisms	29
3.4.1	Incorporation of Halogens	29
3.4.2	Incorporation of Sulfur	30
3.4.3	Incorporation of Silicon	31

VIII Contents

3.5	Rare Chemical Elements Encountered in Marine Substances: As, B, Ni, V, Zn	32
3.5.1	Arsenic	32
3.5.2	Boron	32
3.5.3	Nickel	32
3.5.4	Vanadium	33
3.5.5	Zinc	33
	Selection of Documentary Resources	33
	References	33
	Websites	36

4

Basic Marine Pharmacology

4.1	The Hopes of the Past	37
4.2	The Realities of the Present	39
4.2.1	Ethnopharmacology	39
4.2.2	The Triptych: Biodiversity–Chemodiversity–Pharmacodiversity	40
4.2.3	Methods	44
4.3	Future Directions	46
4.3.1	Bryostatin 1	47
4.3.2	Didemnin B and Dehydroidemnin B	48
4.3.3	Discodermolide	49
4.3.4	Dolastatin 10	49
4.3.5	Ecteinascidin-743	50
4.3.6	Halichondrins	50
4.3.7	KRN7000	50
4.3.8	Squalamine	51
4.3.9	Ziconotide (SNX-111; Prialt™)	51
4.3.10	Marine Natural Products Marketed as Biological Tools	52
	Selection of Documentary Resources	52
	References	52
	Websites	56

5

Documentary Resources

5.1	Short Historical Background	59
5.2	Printed Documentation	60
5.2.1	Chemical Abstracts, Biological Abstracts, Current Contents	60
5.2.2	Basic Works	60
5.2.3	Reference Works	61
5.2.4	Articles Published in Volumes not Entirely Dedicated to Marine Organisms	61
5.2.5	Scientific Journals and the Impact Factor	62
5.2.6	Scientific Journals Specializing in Developments	63

5.2.7	Articles about Development Published in other Scientific Journals	65
5.2.8	Proceedings of the Major International Symposia	66
5.2.9	General Articles on the Synthesis of Marine Natural Products	67
5.3	Electronic Documentation	68
5.3.1	“Static” Databases	68
5.3.2	“Dynamic” Databases	68
5.3.3	Searching for Information on the Internet	68

Part 2

Archaea and Eubacteria

6

Archaea

6.1	General Introduction	73
6.2	Membrane Lipids	74
6.3	Macrocyclic Dialkyl Glycerol Diethers	79
6.4	Paleotemperatures Index: TEX₈₆ and BIT Index	80
6.5	Pranylquinones	81
6.6	Cyclic Polysulfides	83
6.7	Bacteriorhodopsin of Halophiles	83
6.8	Extremozymes	84
	Appendix 6.A: Stereospecific Numbering (<i>sn</i>)	86
	Selection of Documentary Resources	86
	References	86
	Websites	89
	Synthesis	90

7

Eubacteria – 1

7.1	Cell Walls and Gram Reaction	91
7.2	Anaerobic and Aerobic Photosynthesis: Bacteriochlorophylls	93
7.3	Brief Overview of Marine Bacteria	93
7.4	Piezophile (Barophile) and Psychrophile Bacteria from Extreme Environments	95
7.5	Examples of Metabolites Isolated from Nonphotosynthetic Bacteria	96

7.6	Lipopolysaccharides and Other Characteristics of Some Gram-Negative Bacteria	124
7.7	Exopolysaccharides	125
7.8	Anaerobic Photosynthetic Bacteria	125
7.9	Aerobic Photosynthetic Bacteria	125
7.10	Anammox Bacteria and “Ladderane Lipids”	125
	Appendix 7.A	126
	Selection of Documentary Resources	127
	References	127
	Websites	136
	Synthesis	136

8

Eubacteria – 2

8.1	Prochlorophyta	141
8.1.1	Taxonomy of Prochlorophyta	141
8.1.2	Unique Characteristics of Photosynthesis in <i>Prochlorococcus</i>	142
8.1.3	Biochemical Data on <i>Prochloron didemni</i>	142
8.1.4	Biochemical Data on <i>Prochlorothrix hollandica</i>	143
8.2	Cyanobacteria	144
8.2.1	Traditional Classification of Cyanobacteria	144
8.2.2	Photosynthetic Pigments	144
8.2.3	Membrane Lipids	147
8.2.4	General Characteristics of the Secondary Metabolites	149
8.2.5	Malyngamides and Other Chlorinated Derivatives	149
8.2.6	Semiplenamides A–G and Besarhanamides A–B	153
8.2.7	Apysiatxin, Oscillatoxin A, and Other Brominated Derivatives	154
8.2.8	Lactones, Macrolides, and Glycosylated Macrolides	156
8.2.9	Other Nonpeptidic Nitrogenous Derivatives	158
8.2.10	Lipopeptides, Peptides, and Depsipeptides	160
8.2.11	Other Toxins	176
8.2.12	Sulfated and Sulfur-Containing Compounds	177
8.2.13	Polymethoxyalkenes and Poly- β -Hydroxybutyric Acids (PHBAs)	180

8.2.14	Other Molecules	180
	Appendix 8.A: Some Source Data on the Configuration of Aldohexoses	181
	Appendix 8.B: Some Source Data on the Configuration of Aldohexoses (cont.)	182
	Selection of Documentary Resources	183
	References	183
	Websites	192
	Synthesis	193

Part 3

Photosynthetic Eukaryotes

9

Bacillariophyceae (Diatoms)

9.1	Frustules: Fundamental Characteristics of Diatoms	205
9.2	Bases of Classification of Diatoms	206
9.3	Primary Metabolites	206
9.4	Photosynthetic Pigments	206
9.5	Membrane Lipids	207
9.6	Terpenic Hydrocarbons and Linear Polyunsaturated Alkenes	209
9.7	Other Terpenic Derivatives: Description of the Two Biosynthetic Pathways	210
9.8	Genera <i>Nitzschia</i> and <i>Pseudo-nitzschia</i> : Domoic Acid and Analogs	212
9.9	Other Molecules	214
	Appendix 9.A	216
	Appendix 9.B	217
	Selection of Documentary Resources	218
	References	218
	Websites	221
	Synthesis	221

10

Chrysophyceae, Raphidophyceae, Haptophyceae

10.1	Chrysophyceae	223
10.1.1	General Presentation: Simplified Classification	223

10.1.2	Photosynthetic Pigments and Storage Polysaccharides	223	11.15	Saxitoxin and its Derivatives	257
10.1.3	Fatty Acids	223	11.16	Nitrogenous Toxins with Imine Function	258
10.1.4	Sterols	223	11.17	Zooxanthellatoxins (ZTs) and other Nitrogenous Toxins	259
10.1.5	Other Derivatives	224	11.18	<i>Pfiesteria piscicida</i> : A Particularly Toxic Dinoflagellate	261
10.2	Raphidophyceae	226	11.19	Sulfur-Containing Derivatives	261
10.3	Haptophyceae	226	11.20	Phosphorus Derivatives and other Unusual Compounds	262
10.3.1	General Presentation: Simplified Classification	226		Selection of Documentary Resources	262
10.3.2	Photosynthetic Pigments	226		References	262
10.3.3	Sterols	227		Websites	272
10.3.4	Fatty Acids and other Linear Derivatives	227		Synthesis	274
10.3.5	Prymnesins	228			
10.3.6	Particular Characteristics of <i>Pavlova pinguis</i> and <i>Pleurochrysis carterae</i>	230			
	Appendix 10.A	231			
	Selection of Documentary Resources	232			
	References	232			
	Websites	233			
	Synthesis	234			
11			12		
Dinophyceae (Dinoflagellates)		235	Chlorophyceae (Green Algae) and Marine Spermatophyta		285
11.1	General Aspects	235	12.1	General Aspects	285
11.2	Classification of Dinoflagellates	235	12.2	Elements of Classification of Marine Macroalgae	285
11.3	Photosynthetic Pigments	236	12.3	Classification of Chlorophyceae	285
11.4	Sulfated Exopolysaccharides	237	12.4	Chlorophylls, Carotenoids, and Xanthophylls	286
11.5	Sterols	237	12.5	Storage Polysaccharides: Starches	288
11.6	Fatty Acids	239	12.6	Cell-Wall Polysaccharides	289
11.7	Glycolipids	240	12.7	Matrix Polysaccharides	289
11.8	Amphidinols and other Polyhydroxylated Polyenic Derivatives	240	12.8	Membrane Lipids: Fatty Acids and Sterols	290
11.9	Toxic Proliferations: Endotoxins and Exotoxins	243	12.9	Oxylipins	292
11.10	Main Types of Dinoflagellate Toxins	245	12.10	Background on the Secondary Metabolites of Chlorophyceae	293
11.11	Cyclic Polyethers	245	12.11	Terpenes	293
11.12	Okadaic Acid and Derivatives	251	12.12	Meroterpenes of Dasycladales	297
11.13	Toxic Macrolides: Amphidinolides, Caribonolide, Goniodomin A, Hoffmanniolide	252	12.13	Aromatic Derivatives	298
11.14	Complexity of the Biosynthesis of Polyketides	255	12.14	Amino Acids, Amines, and Betaines	298
			12.15	Peptides and Depsipeptides: Kahalalides	299
			12.16	Other Nitrogen-Containing Derivatives	301
			12.17	Sulfur-Containing Derivatives	302

12.18	Marine Spermatophyta (Phanerogams)	303	13.22	Halogenated Phloroglucinols of <i>Rhabdonia verticillata</i> (Gigartinales, Solieriaceae)	338
12.19	Mangrove Plants	305	13.23	Sulfated Aromatic Derivatives of <i>Tichocarpus crinitus</i> (Gigartinales, Tichocarpaceae)	340
	Selection of Documentary Resources	305	13.24	Nitrogen-Containing Derivatives of Gigartinales	340
	References	305	13.25	Halogenated Compounds of Ceramiales: General Comments	341
	Websites	310	13.26	Polyhalogenated Monoterpenes of <i>Pantoneura plocamioides</i> (Ceramiales, Delesseriaceae)	342
	Synthesis	310	13.27	Sesquiterpenes of <i>Laurencia</i> (Ceramiales, Rhodomelaceae)	342
13			13.28	Halogenated Diterpenes of <i>Laurencia</i>	353
Rhodophyceae (Red Algae)		313	13.29	Squalenoids of <i>Laurencia</i> species and <i>Chondria armata</i>	363
13.1	Special Features of Red Algae	313	13.30	Cyclic Halogenated C ₁₅ Ethers and Polyethers of <i>Laurencia</i> and <i>Chondria</i>	366
13.2	Classification of Rhodophyceae	313	13.31	Bromo- and Polybromophenols of Ceramiales	367
13.3	Photosynthetic Pigments	315	13.32	Nitrogen-Containing Bromophenols of <i>Rhodomela confervoides</i> and <i>Osmundaria colensoi</i>	375
13.4	Storage Monosaccharides and Polysaccharides	316	13.33	Other Nitrogen-Containing Derivatives of Ceramiales	375
13.5	Skeleton Polysaccharides	316	13.34	Cyclic Polysulfides of <i>Chondria californica</i>	379
13.6	Matrix Polysaccharides: Carrageenans and Agars	316	13.35	Arsenic-Containing Derivative of <i>Chondria crassicaulis</i>	380
13.7	Carrageenophytes and Agarophytes	319	13.36	Some Atypical Derivatives of <i>Laurencia</i> Species	380
13.8	Gelling Agents and Thickeners	319	13.37	Macrocyclic α -Pyrone of <i>Neurymenia fraxinifolia</i>	380
13.9	Other Types of Matrix Polysaccharides	320	13.38	Halogenated Derivatives of Nemaliales	381
13.10	Phospholipids and Fatty Acids	320	13.39	Acetylenic Acids of <i>Liagora farinosa</i>	383
13.11	Oxylipins and Prostaglandins	322	13.40	Sulfated Triterpene Alcohols of <i>Tricleocarpa fragilis</i>	383
13.12	Sterols and Ecdysteroids	323	13.41	Cyclic Peptide from <i>Galaxaura filamentosa</i>	383
13.13	General Comments on the Secondary Metabolites	325		Appendix 13.A	386
13.14	Secondary Metabolites of Cryptonemiales	326		Appendix 13.B	386
13.15	Secondary Metabolites of Gelidiales	329		Selection of Documentary Resources	387
13.16	Secondary Metabolites of Rhodymeniales	330		References	387
13.17	Polyhalogenated Monoterpenes of Gigartinales	330			
13.18	Diterpenes of <i>Sphaerococcus coronopifolius</i> (Gigartinales, Sphaerococcaceae)	334			
13.19	Macrocyclic Pyrone of <i>Phacelocarpus labillardieri</i> (Gigartinales, Sphaerococcaceae)	337			
13.20	Polycavernosides of <i>Polycavernosa tsudai</i> (Gigartinales, Gracilariaceae)	338			
13.21	Brominated Meroditerpenes of <i>Callophycus serratus</i> (Gigartinales, Solieriaceae)	338			

	Websites	405			
	Synthesis	405			
14					
	Phaeophyceae (Brown Algae)	417			
14.1	General Introduction	417	14.19	Derivatives of Nitrogen, Phosphorus, and Arsenic	461
14.2	Classification of Phaeophyceae	417	14.20	Sulfur-Containing Derivatives	464
14.3	Photosynthetic Pigments	418	14.21	Iodinated Derivatives	464
14.4	Laminarans and Other Storage Osides	419		Appendix 14.A: Evolution of Concepts for the Classification of Phaeophyceae	466
14.5	Matrix Polysaccharides: Alginic Acids and Alginates	420		Appendix 14.B: A Summary of the Radical Coupling of Phenols	467
14.6	Fucoidans (Sulfated Fucans)	421		Selection of Documentary Resources	467
14.7	Lipids and Fatty Acids	423		References	467
14.8	Oxylipins of Laminariales	424		Websites	479
14.9	Epoxy Lipids of <i>Notheia anomala</i> (Chordariales)	427		Synthesis	479
14.10	Sterols	428	15		
14.11	Volatile Hydrocarbons and Sexual Chemotaxy	429		Major Uses of Macroalgae	485
14.12	Background on the Secondary Metabolites	432	15.1	Overview	485
14.13	Sesquiterpenes of Dictyotales	433	15.2	Estimates of Resources	485
14.14	Cyclic Diterpenes of Dictyotales	434	15.3	Edible Seaweed	486
14.15	Linear Diterpenes of Fucales and Other Derivatives	440	15.4	Dietary Properties of Marine Algae	487
14.16	Phenols and Phlorotannins	442	15.5	Physico-Chemical Aspects of Phycocolloids	488
14.17	Other Aromatic Derivatives	446	15.6	Economic Aspects of Phycocolloids	490
14.18	Meroterpenes: General Comments	447	15.7	Major Producing Countries of Phycocolloids	491
14.18.1	Prenylated Quinones and Hydroquinones	447	15.8	Main Applications of Agars	491
14.18.2	Meromonoterpenes of <i>Sporochnus bolleanus</i>	449	15.9	Main Applications of Carrageenans and Furcellarans	492
14.18.3	Merosesquiterpenes of <i>Dictyopteris</i> Species	449	15.10	Main Applications of Alginic Acid and Alginates	493
14.18.4	Meroditerpenes of the Genera <i>Taonia</i> and <i>Stypopodium</i>	450	15.11	Summary of Research in the Field of Healthcare	493
14.18.5	Meroditerpenes of <i>Cystoseira</i> Species: Chemotaxonomy of Cystoseiraceae	454	15.12	Antiviral and Immunostimulant Sulfated Polysaccharides of Red, Brown, and Green Algae	494
14.18.6	Meroditerpenes of <i>Bifurcaria galapagensis</i>	460	15.13	Anticoagulant and Antithrombotic Properties of Fucoidans	495
14.18.7	Chlorinated Meroditerpenes	460	15.14	Antitumoral, Immunomodulatory, and Antiviral Properties of Fucoidans	496
14.18.8	Nahocols and Isonahocols: Rearranged Linear Meroditerpenes of <i>Sargassum autumnale</i>	460	15.15	Other Examples of Biological Activities of Macroalgae	497
			15.16	Uses of Algae in Cosmetics	497

15.17	Uses of Algae in Agriculture and Livestock Production 498
	Selection of Documentary Resources 498
	References 498

Part 4 Fungi and Other Eukaryotic Unicellular Nonphotosynthetic Organisms

16

Fungi 507

16.1	The Fungal Kingdom: The Concept of Marine Fungi 507
16.2	Mastigomycetes and Eumycetes (True Fungi) 508
16.3	Elements of Classification of Eumycetes 508
16.4	Background Information on the Structure of Chitin 508
16.5	Fatty Acids 509
16.6	Sterols 510
16.7	Membrane Peptides of Fungi: Peptaibols 510
16.8	General Comments on Secondary Metabolites of Marine Fungi 511
16.9	Substances Isolated from Fungi Collected from the Surface of the Sea 512
16.10	Substances Isolated from Fungi from Sediments and other Inert Substrates 513
16.11	Substances Isolated from Fungi Associated with Cyanobacteria 521
16.12	Algicolous Fungi: General Remarks 521
16.13	Substances Isolated from Fungi Associated with Green Algae and Marine Spermatophyta 522
16.14	Substances Isolated from Fungi Associated with Red Algae 526
16.15	Substances Isolated from Fungi Associated with Brown Algae 528
16.16	Substances Isolated from Lignicolous Fungi 531

16.17	Substances Isolated from Fungi Associated with Sponges 537
16.18	Substances Isolated from Fungi Associated with Cnidarians 548
16.19	Substances Isolated from Fungi Associated with Mollusks 551
16.20	Substances Isolated from Fungi Associated with Bryozoans 553
16.21	Substances Isolated from Fungi Associated with Echinoderms 553
16.22	Substances Isolated from Fungi Associated with Crustaceans 555
16.23	Substances Isolated from Fungi Associated with Tunicates (Ascidians) 555
16.24	Substances Isolated from Fungi Associated with Fish 557
16.25	Summary of Marine-Derived Fungi 559

Volume 2: Porifera, Cnidaria, and Ctenophora**Part 5****Diploblastic Organisms: Porifera, Cnidaria, Ctenophora****19****Porifera (Sponges) 607**

19.1 Overview of the Universe of Sponges 607

19.2 Metabolites of Calcarea (Calcereous Sponges) 610

19.2.1 General Characteristics of Calcarea 610

19.2.2 Fatty Acids 610

19.2.3 Sterols 611

19.2.4 Non-Nitrogenous Derivatives of Species of the Genus *Leucetta* 61119.2.5 Imidazole Alkaloids and Zinc Complexes Isolated from the Genera *Leucetta*, *Leucosolenia*, and *Clathrina* 61219.2.6 $\alpha\omega$ -Bis Long-Chain Aminoalcohols 615

19.2.7 Nitrogen-Containing Macrolides and Cyclic Peptides 615

19.2.8 Other Nitrogen-Containing Compounds of Calcarea 616

19.3 Metabolites of Hexactinellida 616

19.4 Classification and Membrane Constituents of Demospongiae 618

19.4.1 Classification 618

19.4.2 Some Physical Observations on Demosponges 619

19.4.2.1 Shape and Size 619

19.4.2.2 Consistency 619

19.4.2.3 Color and Odor 619

19.4.3 Diversity of Membrane Constituents: Some Examples 622

19.4.4 Phospholipids and "Demosponging Acids" 625

19.4.5 Fatty Acids with 5,9 Dienic Structure 628

19.4.6 Other Mono- and Polyunsaturated Fatty Acids 628

19.4.7 Branched Fatty Acids 630

19.4.8 Isoprenic Acids 634

19.4.9 Cyclopropanic Acids 635

19.4.10 Brominated Acids 637

19.4.11 2-O Substituted Acids 638

19.4.12 Sulfur Derivatives of Demosponging Acids 640

19.4.13 Intracellular Localization and Biological Activity of Demosponging Acids 640

19.4.14 Brief Reminder About Conventional Sterols 641

19.4.15 Unconventional Sterols Produced by Changes in the Tetracyclic System 643

19.4.16 Unconventional Sterols Produced by Polymethylation of the Side Chain 646

19.4.17 Sterols with Degraded Side Chains 650

19.4.18 Sterols and Stanols with Cyclopropanic and Cyclopropenic Side Chains 650

19.4.19 Secosterols 652

19.4.20 Polyhydroxylated Steroids and Derivatives, Peroxysterols 657

19.4.21 Sulfated Sterols 659

19.4.22 Chlorinated Sterols and Sterones 662

19.4.23 Nitrogen-Containing Sterols 665

19.4.24 Glycolipids 665

19.5 Secondary Metabolites of Homoscleromorpha 670

19.5.1 Fatty Acids, Polyketides and Oxylipins of *Plakinastrella* and *Plakortis* 67119.5.2 Cyclic Peroxides and Peroxylactones from *Plakinastrella* and *Plakortis* 673

19.5.3	Glycosides	677	19.8.4	Specific Glycolipids of <i>Theonella swinhoei</i> , <i>Discodermia calyx</i> and <i>D. dissoluta</i>	721
19.5.4	Polyhydroxylated Sterols of <i>Oscarella lobularis</i>	677	19.8.5	Long-Chain Polyacetylenic Derivatives of <i>Theonella</i> sp.	722
19.5.5	Alkaloids and Other Original Nitrogen Derivatives of <i>Plakortis</i> and <i>Corticium</i>	677	19.8.6	3 β -Methoxysterols of <i>Jereicopsis</i> <i>graphidiophora</i>	722
19.6	Secondary Metabolites of Astrophorida	680	19.8.7	4-Methylene Sterols and Sterones of <i>Theonella</i>	722
19.6.1	Acetylenic Fatty Acids of <i>Stelletta</i>	680	19.8.8	Macrolides	724
19.6.2	Cyclitol Derivatives	680	19.8.9	Examples of Acetogenins: Discodermolide, Caliculins, and Onnamides	727
19.6.3	Glycolipids: Caminosides and Pachymosides	681	19.8.10	Linear Amides and Peptides	729
19.6.4	Triterpenes of Malabaricane and Isomalabaricane: Sesterterpenes	682	19.8.11	Mono- and Bicyclic Peptides	732
19.6.5	Triterpenic Glycosides and Steroidal Glycosides	685	19.8.12	Symbiotic Origin of Some Polypeptides	736
19.6.6	Substituted Tetramic Acids and Derived Glycosides	688	19.8.13	Cyclic and Linear Depsipeptides	736
19.6.7	Erylusamines, Erylusine, and Erylusidine	690	19.8.14	Atypical Nitrogenous Derivatives	741
19.6.8	Cyclic Depsipeptides, Peptolides, and Macrolactones	690	19.9	Secondary Metabolites of Spirophorida	742
19.6.9	Nitrogen-Containing Terpenes	695	19.9.1	Atypical Sterols of <i>Cinachyra</i> , <i>Microscleroderma</i> , and <i>Scleritoderma</i>	742
19.6.10	Bengazoles and Bengamides	696	19.9.2	Cinachyrolide A, Enigmazole A	742
19.6.11	Atypical Nitrogenous Derivatives	696	19.9.3	Microsclerodermins and Aciculitins	743
19.6.12	Phosphorus-Containing Derivatives	701	19.9.4	Examples of Atypical Derivatives of Some Sponges of the Tetillidae	744
19.6.13	Aromatic and Heteroaromatic Sulfated Derivatives	702	19.10	Secondary Metabolites of Agelasida	744
19.6.14	Isotactic Polymethoxydienes of <i>Myriastra clavosa</i>	703	19.10.1	Sterols	745
19.7	Secondary Metabolites of Hadromerida and Chondrosida	703	19.10.2	Diterpenes and Carotenoids	745
19.7.1	Perforating Power of Clionaidae	704	19.10.3	Gracilioethers of <i>Agelas gracilis</i>	746
19.7.2	lyso-Phospholipids and Sulfated Sphingosines of <i>Spirastrella abata</i>	705	19.10.4	Merosesquiterpenes and Nitrogen- Containing Meroditerpenes	746
19.7.3	Brominated Acetylenic Derivatives of <i>Diplastrella</i>	706	19.10.5	Galactosylceramides and Glycolipids	748
19.7.4	Cyclic Peroxides	706	19.10.6	Oroidin and Related C ₁₁ N ₅ Bromopyrrole Alkaloids	749
19.7.5	Terpenes	708	19.10.6.1	Oroidin Series	749
19.7.6	Unconventional Sterols	709	19.10.6.2	Agelastatin A Series	753
19.7.7	Macrolactones: Latrunculins and Spongistatins	710	19.10.6.3	Other Series	753
19.7.8	Atypical Glycosides of <i>Latrunculia</i> <i>corticata</i>	711	19.10.7	Pyrrole-2-carboxylic Acid Derivatives	754
19.7.9	Other Nitrogen-Free Toxins	712	19.10.8	Other Examples of Nitrogen-Containing Heterocycles	754
19.7.10	Peptides and Depsipeptides	713	19.10.9	Betaines	756
19.7.11	Pyrrole Derivatives and other Nitrogen- Containing Heterocycles	715	19.11	Secondary Metabolites of Halichondrida	756
19.7.12	Atypical Nucleosides	718	19.11.1	A-nor-Steroids and Other Nonconventional Sterols	756
19.8	Secondary Metabolites of Lithistida	719	19.11.2	Conventional Terpenes	760
19.8.1	Particular Characteristics of Lithistid Sponges	719	19.11.3	Nitrogen-Containing Terpenes: Isonitriles and Related Derivatives	766
19.8.2	Unusual Halogenated Fatty Acids	720	19.11.4	Other Terpenes	773
19.8.3	Nitrogen-Containing Sesquiterpenes of <i>Theonella</i>	720	19.11.5	Long-Chain Linear Polyamines and α,ω -bis-isothiocyantes	773
			19.11.6	Polyethers: Halichondrins, Okadaic, and Glycookadaic Acids	774
			19.11.7	Various Lipids	775

- 19.11.8 Linear Peptides of the Genera *Auletta* and *Cymbastela* 779
- 19.11.9 Depsipeptides and Cyclic Peptides 780
- 19.11.10 Unusual Amino Acids and Betaines 786
- 19.11.11 Pyrrole, Imidazole, Pyridine, Isoquinoline, and Indole Derivatives 786
- 19.11.11.1 Pyrrole Derivatives 786
- 19.11.11.2 Imidazole Derivatives 787
- 19.11.11.3 Pyridine and Isoquinoline Derivatives 787
- 19.11.11.4 Indole Derivatives 787
- 19.11.12 Heterocycles Related to the Oroidin Family 789
- 19.11.13 Atypical Halogenated and Sulfur-Containing Derivatives 791
- 19.12 Secondary Metabolites of Haplosclerida 792**
- 19.12.1 Acetylenic Derivatives 793
- 19.12.2 1-Glyceryl Ethers from the Assemblage *Ceratodictyon/Spongiosum/Haliclona/Cymaeformis* 794
- 19.12.3 Atypical Fatty Acids 794
- 19.12.4 Terpenes and Meroterpenes 800
- 19.12.5 Triterpenic Glycosides 807
- 19.12.6 Hopanoids, Steroids and Sterosides 810
- 19.12.7 Macrolides, Depsipeptides, and Cyclic Peptides 815
- 19.12.8 Aminoalcohols and Glycosphingolipids (Cerebrosides) 818
- 19.12.9 Manzamines and Related Derivatives 821
- 19.12.10 Quinolizidine and 1-Oxaquinolizidine Derivatives 821
- 19.12.11 Pyridine Derivatives and 3-alkylpyridinium Salts 827
- 19.12.12 Pyrdoacridine Alkaloids 831
- 19.12.13 Pyrroloquinones and Other Examples of Nitrogen-Containing Heterocycles 832
- 19.12.14 Quinones and Sulfated Hydroquinones 837
- 19.12.15 Very Long-Chain Linear Sulfated Derivatives 839
- 19.12.16 Thiocyanatins: α,ω -Dithiocyanates of *Oceanapia* sp. 839
- 19.12.17 Some Information on Freshwater Haplosclerid Sponges 840
- 19.13 Secondary Metabolites of Poecilosclerida 841**
- 19.13.1 Sterols, Steroids, and Sterosides 842
- 19.13.2 Terpenes and Triterpenic Glycosides 847
- 19.13.3 Polybrominated Acetogenins and Oxylipins 854
- 19.13.4 Long-Chain Acetylenic Derivatives: Raspailynes 854
- 19.13.5 Glycolipids 855
- 19.13.6 Brominated Aromatic Derivatives of *Hamigera tarangaensis* 856
- 19.13.7 Macrolides 856
- 19.13.8 Chondropsins: Cyclic Depsipeptides of *Chondropsis* sp. 860
- 19.13.9 Eurypamides (*Microcion* *eurypa*), Microcionamides (*Clathria abietina*) and Other Cyclic Peptides 861
- 19.13.10 Linear Amides and Peptides 862
- 19.13.11 Examples of Some Atypical Sulfur-Containing Derivatives 864
- 19.13.12 Pyrrole and Indole Derivatives 865
- 19.13.13 Pyridines, Quinolizines, and Pyrdoacridines 868
- 19.13.14 Guanidine Derivatives 869
- 19.13.15 Pyrroloiminoquinones and Pyrroloquinones 872
- 19.13.16 Azasugars and Cyclic Amines 874
- 19.13.17 Other Examples of Polycyclic Alkaloids 874
- 19.13.18 Phosphorus- and Arsenic-Containing Derivatives, Betaines 876
- 19.14 General Information on the Metabolites of Sponges Lacking Mineral Spicules 878**
- 19.15 Secondary Metabolites of Dendroceratida 880**
- 19.15.1 Terpenes and Meroterpenes 880
- 19.15.2 Sterols 891
- 19.15.3 Polybromophenols and Polybromodiphenyl Ethers of *Dysidea* 891
- 19.15.4 Nitrogen-Containing Compounds 891
- 19.16 Secondary Metabolites of Dictyoceratida 899**
- 19.16.1 Fatty Acids and Glycolipids 899
- 19.16.2 Sterols 900
- 19.16.3 Terpenes and Meroterpenes 901
- 19.16.4 Polybromodiphenyl Ethers and other Halogenated Aromatic Derivatives 925
- 19.16.5 Laulimalide, Althohyrins, Chondropsins, Haterumalides, and Other Macrolides 925
- 19.16.6 Linear and Cyclic Peptides, Depsipeptides 928
- 19.16.7 Alkaloids and Other Nitrogen-Containing Compounds 930
- 19.16.8 Phosphorus Derivatives 933
- 19.16.9 Atypical Sulfur Derivatives 933
- 19.17 Secondary Metabolites of Verongida 934**
- 19.17.1 3,5-Dibromotyrosine Derivatives 935
- 19.17.2 Other Nitrogen-Containing Compounds 944
- 19.17.3 Glycerol Ethers and Glycosphingolipids 946
- 19.17.4 Sulfated Aromatic Compounds 947
- 19.17.5 Metabolites Specific to the Family Ianthellidae 947
