

Contents at a Glance

Introduction	1
Part 1: An Overview of Calculus	5
CHAPTER 1: What Is Calculus?	7
CHAPTER 2: The Two Big Ideas of Calculus: Differentiation and Integration — plus Infinite Series	13
CHAPTER 3: Why Calculus Works	21
Part 2: Warming Up with Calculus Prerequisites	27
CHAPTER 4: Pre-Algebra and Algebra Review	29
CHAPTER 5: Funky Functions and Their Groovy Graphs	43
CHAPTER 6: The Trig Tango	61
Part 3: Limits	73
CHAPTER 7: Limits and Continuity	75
CHAPTER 8: Evaluating Limits	89
Part 4: Differentiation	105
CHAPTER 9: Differentiation Orientation	107
CHAPTER 10: Differentiation Rules — Yeah, Man, It Rules	127
CHAPTER 11: Differentiation and the Shape of Curves	147
CHAPTER 12: Your Problems Are Solved: Differentiation to the Rescue!	171
CHAPTER 13: More Differentiation Problems: Going Off on a Tangent	193
Part 5: Integration and Infinite Series	207
CHAPTER 14: Intro to Integration and Approximating Area	209
CHAPTER 15: Integration: It's Backwards Differentiation	233
CHAPTER 16: Integration Techniques for Experts	263
CHAPTER 17: Forget Dr. Phil: Use the Integral to Solve Problems	285
CHAPTER 18: Taming the Infinite with Improper Integrals	303
CHAPTER 19: Infinite Series	315
Part 6: The Part of Tens	339
CHAPTER 20: Ten Things to Remember	341
CHAPTER 21: Ten Things to Forget	345
CHAPTER 22: Ten Things You Can't Get Away With	349
Index	353

Table of Contents

INTRODUCTION	1
About This Book	1
Foolish Assumptions	2
Icons Used in This Book	3
Beyond the Book	4
Where to Go from Here	4
PART 1: AN OVERVIEW OF CALCULUS	5
CHAPTER 1: What Is Calculus?	7
What Calculus Is Not	8
So What Is Calculus, Already?	8
Real-World Examples of Calculus	10
CHAPTER 2: The Two Big Ideas of Calculus: Differentiation and Integration — plus Infinite Series	13
Defining Differentiation	14
The derivative is a slope	14
The derivative is a rate	15
Investigating Integration	16
Sorting Out Infinite Series	18
Divergent series	18
Convergent series	18
CHAPTER 3: Why Calculus Works	21
The Limit Concept: A Mathematical Microscope	21
What Happens When You Zoom In	22
Two Caveats; or Precision, Preschmidgen	24
I may lose my license to practice mathematics	25
What the heck does “infinity” really mean?	25
PART 2: WARMING UP WITH CALCULUS PREREQUISITES	27
CHAPTER 4: Pre-Algebra and Algebra Review	29
Fine-Tuning Your Fractions	29
Some quick rules	30
Multiplying fractions	30
Dividing fractions	30
Adding fractions	31
Subtracting fractions	32
Canceling in fractions	32

Absolute Value — Absolutely Easy	34
Empowering Your Powers	34
Rooting for Roots.	35
Roots rule — make that, root rules.	36
Simplifying roots	36
Logarithms — This Is Not an Event at a Lumberjack Competition.	37
Factoring Schmactoring — When Am I Ever Going to Need It?	38
Pulling out the GCF	38
Looking for a pattern	39
Trying some trinomial factoring	39
Solving Quadratic Equations	40
Method 1: Factoring	40
Method 2: The quadratic formula.	41
Method 3: Completing the square	42
CHAPTER 5: Funky Functions and Their Groovy Graphs	43
What Is a Function?	43
The defining characteristic of a function	43
Independent and dependent variables	45
Function notation	45
Composite functions.	46
What Does a Function Look Like?	47
Common Functions and Their Graphs.	49
Lines in the plane in plain English.	49
Parabolic and absolute value functions — even steven	53
A couple oddball functions.	53
Exponential functions.	54
Logarithmic functions.	55
Inverse Functions	55
Shifts, Reflections, Stretches, and Shrinks	57
Horizontal transformations	57
Vertical transformations.	59
CHAPTER 6: The Trig Tango.	61
Studying Trig at Camp SohCahToa	61
Two Special Right Triangles	62
The 45°-45°-90° triangle	63
The 30°-60°-90° triangle	63
Circling the Enemy with the Unit Circle	64
Angles in the unit circle.	64
Measuring angles with radians	65
Honey, I shrunk the hypotenuse.	66
Putting it all together	67
Graphing Sine, Cosine, and Tangent.	69
Inverse Trig Functions.	71
Identifying with Trig Identities.	72

PART 3: LIMITS	73
CHAPTER 7: Limits and Continuity	75
Take It to the Limit — NOT	75
Using three functions to illustrate the same limit	76
Sidling up to one-sided limits	77
The formal definition of a limit — just what you've been waiting for	78
Limits and vertical asymptotes	79
Limits and horizontal asymptotes	80
Calculating instantaneous speed with limits	80
Linking Limits and Continuity	83
Continuity and limits usually go hand in hand	84
The hole exception tells the whole story	85
Sorting out the mathematical mumbo jumbo of continuity	86
The 33333 Limit Mnemonic	86
CHAPTER 8: Evaluating Limits	89
Easy Limits	89
Limits to memorize	89
Plugging and chugging	90
The “Real Deal” Limit Problems	91
Figuring a limit with your calculator	91
Solving limit problems with algebra	94
Take a break and make yourself a limit sandwich	96
Evaluating Limits at Infinity	101
Limits at infinity and horizontal asymptotes	101
Solving limits at infinity with a calculator	102
Solving limits at infinity with algebra	103
PART 4: DIFFERENTIATION	105
CHAPTER 9: Differentiation Orientation	107
Differentiating: It's Just Finding the Slope	108
The slope of a line	110
The derivative of a line	112
The Derivative: It's Just a Rate	112
Calculus on the playground	113
Speed — the most familiar rate	114
The rate-slope connection	115
The Derivative of a Curve	115
The Difference Quotient	117
Average Rate and Instantaneous Rate	124
To Be or Not to Be? Three Cases Where the Derivative Does Not Exist	125

CHAPTER 10: Differentiation Rules — Yeah, Man, It Rules	127
Basic Differentiation Rules	128
The constant rule	128
The power rule	128
The constant multiple rule	130
The sum rule — hey, that's some rule you got there	130
The difference rule — it makes no difference	131
Differentiating trig functions	131
Differentiating exponential and logarithmic functions	132
Differentiation Rules for Experts — Oh, Yeah, I'm a Calculus Wonk	133
The product rule	133
The quotient rule	134
The chain rule	135
Differentiating Implicitly	140
Getting into the Rhythm with Logarithmic Differentiation	142
Differentiating Inverse Functions	143
Scaling the Heights of Higher Order Derivatives	144
CHAPTER 11: Differentiation and the Shape of Curves	147
Taking a Calculus Road Trip	147
Climb every mountain, ford every stream: Positive and negative slopes	148
I can't think of a travel metaphor for this section: Concavity and inflection points	149
This vale of tears: A local minimum	149
A scenic overlook: The absolute maximum	149
Car trouble: Teetering on the corner	150
It's all downhill from here	150
Your travel diary	150
Finding Local Extrema — My Ma, She's Like, Totally Extreme	151
Cranking out the critical numbers	151
The first derivative test	153
The second derivative test — no, no, anything but another test!	154
Finding Absolute Extrema on a Closed Interval	157
Finding Absolute Extrema over a Function's Entire Domain	160
Locating Concavity and Inflection Points	162
Looking at Graphs of Derivatives Till They Derive You Crazy	164
The Mean Value Theorem — GRRRRR	168
CHAPTER 12: Your Problems Are Solved: Differentiation to the Rescue!	171
Getting the Most (or Least) Out of Life: Optimization Problems	171
The maximum volume of a box	172
The maximum area of a corral — yeehaw!	173

Yo-Yo a Go-Go: Position, Velocity, and Acceleration	176
Velocity, speed, and acceleration	178
Maximum and minimum height	179
Velocity and displacement	180
Speed and distance traveled	181
Burning some rubber with acceleration	182
Tying it all together	184
Related Rates — They Rate, Relatively	184
Blowing up a balloon.	184
Filling up a trough	186
Fasten your seat belt: You're approaching a calculus crossroads	189
 CHAPTER 13: More Differentiation Problems:	
Going Off on a Tangent	193
Tangents and Normals: Joined at the Hip	193
The tangent line problem.	194
The normal line problem	195
Straight Shooting with Linear Approximations	197
Business and Economics Problems	200
Managing marginals in economics	201
 PART 5: INTEGRATION AND INFINITE SERIES	207
 CHAPTER 14: Intro to Integration and Approximating Area	209
Integration: Just Fancy Addition	210
Finding the Area Under a Curve	211
Approximating Area	214
Approximating area with left sums.	214
Approximating area with right sums	217
Approximating area with midpoint sums	219
Getting Fancy with Summation Notation.	220
Summing up the basics	221
Writing Riemann sums with sigma notation	221
Finding Exact Area with the Definite Integral	224
Approximating Area with the Trapezoid Rule and Simpson's Rule	228
The trapezoid rule	228
Simpson's rule — that's Thomas (1710–1761), not Homer (1987–)	230
 CHAPTER 15: Integration: It's Backwards Differentiation	233
Antidifferentiation	233
Vocabulary, Voshmabulary: What Difference Does It Make?	235
The Annoying Area Function	236
The Power and the Glory of the Fundamental Theorem of Calculus	238

The Fundamental Theorem of Calculus: Take Two	243
Why the theorem works: Area functions explanation	245
Why the theorem works: The integration-differentiation connection	247
Why the theorem works: A connection to — egad! — statistics . . .	249
Finding Antiderivatives: Three Basic Techniques	252
Reverse rules for antiderivatives	252
Guessing and checking	254
The substitution method	256
Finding Area with Substitution Problems	259
CHAPTER 16: Integration Techniques for Experts	263
Integration by Parts: Divide and Conquer	263
Picking your u	266
Integration by parts: Second time, same as the first	268
Tricky Trig Integrals	269
Integrals containing sines and cosines	270
Integrals containing secants and tangents or cosecants and cotangents	273
Your Worst Nightmare: Trigonometric Substitution	274
Case 1: Tangents	275
Case 2: Sines	277
Case 3: Secants	278
The As, Bs, and Cxs of Partial Fractions	279
Case 1: The denominator contains only linear factors	280
Case 2: The denominator contains irreducible quadratic factors	281
Bonus: Equating coefficients of like terms	283
CHAPTER 17: Forget Dr. Phil: Use the Integral to Solve Problems	285
The Mean Value Theorem for Integrals and Average Value	286
The Area between Two Curves — Double the Fun	289
Finding the Volumes of Weird Solids	292
The meat-slicer method	292
The disk method	294
The Washer Method	295
The matryoshka-doll method	297
Analyzing Arc Length	298
Surfaces of Revolution — Pass the Bottle 'Round	300

CHAPTER 18: Taming the Infinite with Improper Integrals	303
L'Hôpital's Rule: Calculus for the Sick	303
Getting unacceptable forms into shape	305
Improper Integrals: Just Look at the Way That Integral Is Holding Its Fork!	307
Improper integrals with vertical asymptotes	308
Improper integrals with one or two infinite limits of integration	310
Blowing Gabriel's horn	312
CHAPTER 19: Infinite Series	315
Sequences and Series: What They're All About	316
Stringing sequences	316
Summing series	318
Convergence or Divergence? That Is the Question	321
A no-brainer divergence test: The n th term test	321
Three basic series and their convergence/divergence tests	322
Three comparison tests for convergence/divergence	325
The two "R" tests: Ratios and roots	331
Alternating Series	333
Finding absolute versus conditional convergence	334
The alternating series test	335
Keeping All the Tests Straight	337
PART 6: THE PART OF TENS	339
CHAPTER 20: Ten Things to Remember	341
Your Sunglasses	341
$a^2 - b^2 = (a - b)(a + b)$	341
$\frac{0}{5} = 0$, but $\frac{5}{0}$ Is Undefined	342
Anything ⁰ = 1	342
SohCahToa	342
Trig Values for 30, 45, and 60 Degrees	342
$\sin^2\theta + \cos^2\theta = 1$	342
The Product Rule	343
The Quotient Rule	343
Where You Put Your Keys	343
CHAPTER 21: Ten Things to Forget	345
$(a + b)^2 = a^2 + b^2$ — Wrong!	345
$\sqrt{a^2 + b^2} = a + b$ — Wrong!	345
Slope = $\frac{x_2 - x_1}{y_2 - y_1}$ — Wrong!	345
$\frac{3a + b}{3a + c} = \frac{b}{c}$ — Wrong!	346
$\frac{d}{dx}\pi^3 = 3\pi^2$ — Wrong!	346

If k Is a Constant, $\frac{d}{dx} kx = k'x + kx'$ — Wrong!	346
The Quotient Rule Is $\frac{d}{dx} \left(\frac{u}{v} \right) = \frac{v'u - vu'}{v^2}$ — Wrong!	346
$\int x^2 dx = \frac{1}{3} x^3$ — Wrong!	346
$\int (\sin x) dx = \cos x + c$ — Wrong!	347
Green's Theorem	347
CHAPTER 22: Ten Things You Can't Get Away With	349
Give Two Answers on Exam Questions	349
Write Illegibly on Exams	349
Don't Show Your Work on Exams	350
Don't Do All of the Exam Problems	350
Blame Your Study Partner for Low Grade	350
Tell Your Teacher You Need an "A" in Calculus to Impress Your Significant Other	350
Claim Early-Morning Exams Are Unfair Because You're Not a "Morning Person"	350
Protest the Whole Idea of Grades	351
Pull the Fire Alarm During an Exam	351
Use This Book as an Excuse	351
INDEX	353
