Contents at a Glance

Introduction 1

Book 1: Wrapping Your Brain Around Blender 7

CHAPTER 1: Discovering Blender 9
CHAPTER 2: Understanding How Blender Thinks 29
CHAPTER 3: Getting Your Hands Dirty Working in Blender 71
CHAPTER 4: Working in Edit Mode and Object Mode 87

Book 2: Creating Detailed 3D Scenes 123

CHAPTER 1: Creating Anything You Can Imagine with Meshes 125
CHAPTER 2: Simplifying Your Life as a Modeler with Modifiers 153
CHAPTER 3: Sculpting in Virtual Space 177
CHAPTER 4: Using Blender's Non-Mesh Primitives 217
CHAPTER 5: Getting Procedural with Geometry Nodes 257

Book 3: Working with Colors and Materials 295

CHAPTER 1: Changing That Boring Gray Default Material 297
CHAPTER 2: Giving Models Texture 337
CHAPTER 3: Lighting and Environment 369
CHAPTER 4: Exporting and Rendering Scenes 409

Book 4: Get Animated! 429

CHAPTER 1: Animating Objects 431
CHAPTER 2: Adding Controls to Your Scene 455
CHAPTER 3: Rigging: The Art of Building an Animatable Puppet 481
CHAPTER 4: Animating Object Deformations 531
CHAPTER 5: Letting Blender Do the Work for You 553
CHAPTER 6: Making 2D and 2.5D Animation with Grease Pencil 587

Book 5: Sharing Your Work with the World 629

CHAPTER 1: Editing Video and Animation 631
CHAPTER 2: Compositing Images and Video 651
CHAPTER 3: Mixing Video and 3D with Motion Tracking 681

Book 6: Getting Technical 705

CHAPTER 1: Working with Linked Data 707
CHAPTER 2: Automating Blender with Python Scripting 719

INTRODUCTION 1
About This Book 2
Foolish Assumptions 2
Icons Used in This Book 4
Beyond the Book 5
Where to Go from Here 5

BOOK 1: WRAPPING YOUR BRAIN AROUND BLENDER 7

CHAPTER 1: Discovering Blender 9
Getting to Know Blender 10
Discovering Blender's origins and the strength of the Blender community 11
Understanding Blender release versions 12
Making open movies and games 13
Joining the community 14
Getting to Know the Interface 15
Working with an interface that stays out of your way 16
Understanding workspaces 18
Blender workflows 20
Resizing areas 22
Customizing headers 23
Maximizing an area 24
The menu that is a pie 25

CHAPTER 2: Understanding How Blender Thinks 29
Menus in Blender 29
Looking at Editor Types 30
General editors 31
Animation editors 32
Scripting editors 33
Data editors 33
Understanding the Properties Editor 34
Navigating in Three Dimensions 37
Orbiting, panning, and zooming the 3D Viewport 37
Changing views 39
Selecting objects 45
Taking advantage of the 3D cursor 48
Extra Features in the 3D Viewport 51
Quad View 52
Regions 52

Collaborating (with others and yourself) with annotations. 55
Don't know how to do something? Hooray for fully integrated search! 56
Customizing Blender to Fit You 57
Using preset workspaces 58
Blender workflows. 62
Setting user preferences 65
Using custom event maps 66
Speeding up your workflow with Quick Favorites 69

CHAPTER 3: **Getting Your Hands Dirty Working in Blender** 71
Grabbing, Scaling, and Rotating 72
Differentiating Between Coordinate Systems 72
Transforming an Object by Using Tools 75
Activating transform tools 76
Using transform gizmos 78
Creating Custom Transform Orientations 81
Saving Time by Using Hotkeys 81
Transforming with hotkeys 82
Hotkeys and coordinate systems 83
Numerical input 85
Other Ways to Transform Objects 85
The Sidebar. 86
Object Properties. 86

CHAPTER 4: **Working in Edit Mode and Object Mode** 87
Making Changes by Using Edit Mode 87
Switching between Object mode and Edit mode 88
Selecting vertices, edges, and faces 89
Understanding ngons and their limitations. 93
Working with linked vertices 94
Still Blender's No. 1 modeling tool: Extrude 95
Modeling organically with Proportional Editing 98
Understanding Datablocks: Fundamental Elements in a Blender File 99
Adding to a Scene 99
Adding objects 100
Meet Suzanne, the Blender monkey. 101
Joining and separating objects 102
Understanding the difference between joins and booleans. 103
Creating duplicates and links. 104
Discovering parents, children, and collections 110
Saving, opening, and appending 119

BOOK 2: CREATING DETAILED 3D SCENES 123

CHAPTER 1: **Creating Anything You Can Imagine with Meshes** 125

Pushing Vertices 126
Getting familiar with Edit mode tools 128
Adding geometry by insetting 133
Cutting edges with the Knife 138
Rounding your corners by beveling 141
Spiraling new geometry into existence with the Spin tool 144
Working with Loops and Rings 147
Understanding edge loops and face loops 147
Selecting edge rings 149
Creating new loops 150
The importance of good topology 151

CHAPTER 2: **Simplifying Your Life as a Modeler with Modifiers** 153

Accessing Blender's Modifiers 154
Understanding Modifier Types 157
Modify modifiers 157
Generate modifiers 159
Deform modifiers 161
Physics modifiers 164
Working with Commonly Used Modifiers 166
Doing half the work (and still looking good!) with the Mirror modifier 166
Smoothing things out with the Subdivision Surface modifier . . . 170
Using the power of Arrays 173

CHAPTER 3: **Sculpting in Virtual Space** 177

Adding Background Images in the 3D Viewport 178
Mastering the types of image objects 179
Changing image object properties 180
Adjusting your image objects 182
Setting Up Your Sculpting Workspace 184
Understanding Matcaps: A Display Option for Sculpting 185
Sculpting a Mesh Object 186
Understanding sculpt tool types 187
Understanding the difference between tools and brushes 198
Tweaking brush properties 198
Refining control of your tools 200
Creating custom brushes 201
Using Blender's texture system to tweak brushes 202

Sculpting with the Multiresolution Modifier 203
Freeform Sculpting with Dynamic Topology (Dyntopo) 205
Sculpting with Voxel Remesh 209
Understanding the Basics of Retopology 212

CHAPTER 4: **Using Blender's Non-Mesh Primitives** 217
Using Curves and Surfaces 218
Understanding the different types of curves 220
The anatomy of a Bézier curve 221
Working with curves 222
Understanding the strengths and limitations of Blender's surfaces 240
Using Metaball Objects 241
Meta-wha? 241
What metaball objects are useful for 245
Adding Text 245
Adding and editing text 246
Controlling text appearance 247
Deforming text with a curve 255
Converting to curves and meshes 256

CHAPTER 5: **Getting Procedural with Geometry Nodes** 257
Discovering the Differences between Destructive and Procedural Modeling 258
Using the Geometry Nodes Workspace 259
Meet the Node editor 260
Spreadsheets? In a 3D Program? Yes 262
Understanding Nodes 265
Working with Nodes 267
Identifying the parts of a node 270
Adding nodes to your network 274
Keeping your nodes organized 275
Getting Familiar with Commonly Used Geometry Nodes 282
Thinking Procedurally: Model Like a Rigger 284

BOOK 3: WORKING WITH COLORS AND MATERIALS 295

CHAPTER 1: **Changing That Boring Gray Default Material** 297
Understanding Materials and Render Engines 298
Quick 'n' Dirty Coloring 301
Setting diffuse colors 301
Assigning multiple materials to different parts of a mesh 303
Using vertex colors 308
Setting Up Node Materials 316

Adjusting your workspace to work with materials 316
Working with nodes 318
Understanding shaders 319
Playing with Materials in Blender 320
Understanding how light reflects 320
Demystifying the Principled BSDF 321
Combining shaders with the Mix Shader node 327
Playing with the Shader to RGB node 333

CHAPTER 2: **Giving Models Texture** 337
Adding Textures 337
Discovering Procedural Textures 338
Using Color Ramps 341
Understanding Texture Mapping 343
Making simple adjustments with the Texture Mapping panel 343
Using texture coordinates 344
Understanding Object coordinates and the UV Project modifier 349
Unwrapping a Mesh 351
Marking seams on a mesh 353
Adding a test grid 354
Generating and editing UV coordinates 355
Painting Textures Directly on a Mesh 358
Preparing to paint 359
Working in Texture Paint mode 361
Using textures on your Draw tool 363
Saving Painted Textures and Exporting UV Layouts 367

CHAPTER 3: **Lighting and Environment** 369
Lighting a Scene 369
Understanding a basic three-point lighting setup 370
Knowing when to use which type of light 373
Lighting for Speedy Renders 390
Working with three-point lighting in Blender 391
Using light portals in Cycles 392
Using Material Preview to set up lighting 394
Setting Up the World 395
Changing the sky to something other than dull gray 396
Using high dynamic range images (HDRIs) for world lighting 397
Understanding ambient occlusion 401
Working with Light Probes in Eevee 403
Baking from your light probes 405
Understanding the limitations of light probes 407

CHAPTER 4: **Exporting and Rendering Scenes** 409
Blender's Render Engines. 410
Rendering a Scene. 412
Creating a still image. 412
Creating a sequence of still images for editing or compositing . . . 419
Rendering a sequence of images versus rendering video. 420
Working with Assets in Blender. 422
Building an asset library 422
Exporting to external formats 426
Importing from other applications 427

BOOK 4: GET ANIMATED! 429

CHAPTER 1: **Animating Objects**. 431
Getting Started with Animation in Blender 432
Creating the illusion of motion with static images 433
Customizing your screen layout for animation. 434
Animating your first scene 435
Understanding Keyframes 437
Inserting keys 438
Animating [almost] anything 440
Working with keying sets 441
Working in the Graph Editor 447
Editing f-curves 449
Using f-curve modifiers. 453

CHAPTER 2: **Adding Controls to Your Scene** 455
Using Constraints Effectively 456
The all-powerful Empty! 458
Adjusting the influence of a constraint 460
Using vertex groups in constraints 461
Controlling the location, rotation, and scale of objects with transform constraints 462
Tracking the motion of another object. 466
Relationship constraints 468
Getting Even More Control with Drivers 470
What are drivers?. 470
When to use drivers 471
Adding a driver quickly 472
Understanding data paths 475
Using the Drivers editor to build complex drivers 477

CHAPTER 3: **Rigging: The Art of Building an Animatable Puppet** 481
Creating Shape Keys 482
Creating new shapes 482
Mixing shapes 485
Knowing where shape keys are helpful 486
Adding Hooks 486
Creating new hooks 487
Knowing where hooks are helpful 488
Using Armatures: Skeletons in the Mesh 488
Editing armatures 489
Putting skin on your skeleton 504
Bringing It All Together to Rig a Character 512
Building Stickman's centerline 512
Adding Stickman's appendages 514
Taking advantage of parenting and constraints 516
Comparing inverse kinematics and forward kinematics 519
Making the rig more user friendly 524
Working with Pose Libraries 527
Building a pose library 527
Using pose libraries 530

CHAPTER 4: **Animating Object Deformations** 531
Working with the Dope Sheet 531
Selecting keys in the Dope Sheet 532
Working with markers 535
Recognizing different kinds of keyframe indicators 536
Animating with Armatures 538
Principles of animation worth remembering 540
Making sense of quaternions (or, "Why are there four rotation curves?!") 543
Copying mirrored poses 544
Doing Nonlinear Animation 546
Working with actions 546
Mixing actions to create complex animation 548
Taking advantage of looped animation 550

CHAPTER 5: **Letting Blender Do the Work for You** 553
Using Particles in Blender 554
Knowing what particle systems are good for 555
Using force fields and collisions 559

Creating Hair and Fur 561
Working with Sculpt mode on hair curves 562
Generating additional hair strands with hair assets in the Asset Browser 565
Rendering hair in Eevee 567
Rendering hair using Cycles 568
Giving Objects Some Jiggle and Bounce 569
Dropping Objects in a Scene with Rigid Body Dynamics 572
Simulating Cloth 573
Splashing Liquids in Your Scene 576
Setting up a liquid simulation 576
Making liquids renderable 578
Baking liquids 579
Smoking without Hurting Your Lungs: Smoke Simulation in Blender 580
Creating a smoke simulation 581
Rendering smoke 582
Cheating (in a Good Way) by Using Quick Effects 585

CHAPTER 6: **Making 2D and 2.5D Animation with Grease Pencil** 587

Getting Started with the 2D Animation Workflow Template 588
Working with Grease Pencil Tools 591
Drawing with Grease Pencil 592
Sculpting Grease Pencil objects 598
Editing Grease Pencil objects 600
Understanding Grease Pencil Materials 601
Mastering Grease Pencil Layers 607
Moving strokes to layers 608
Tweaking your drawings with layer adjustments 609
Automating Your Drawings with Grease Pencil Modifiers 610
Modify modifiers 612
Generate modifiers 613
Deform modifiers 615
Color modifiers 617
Understanding Grease Pencil Effects 617
Animating with Grease Pencil 619
Using a hand-drawn animation workflow with Grease Pencil objects 619
Rigging Grease Pencil objects for animation 624
Integrating Grease Pencil with a 3D Scene 626

BOOK 5: SHARING YOUR WORK WITH THE WORLD 629

CHAPTER 1: Editing Video and Animation 631
Comparing Editing to Compositing 632
Working with the Video Sequencer 632
Adding and editing strips 637
Adding effects and transitions 644
Rendering from the Video Sequencer 646

CHAPTER 2: Compositing Images and Video 651
Understanding Nodes 651
Getting Started with the Compositor 652
Rendering in Passes and Layers 653
Discovering passes available in Eevee and Cycles 656
Using Eevee-only Effects Passes 662
Understanding Cycles-only Passes 662
Working with Nodes 665
Configuring the backdrop 666
Discovering the nodes available to you 667
Rendering from the Compositor 669
Compositing in Real-Time in the 3D Viewport 670
A Simple Example: Replacing a Texture without Re-rendering 671
Setting up your render 672
Bringing an image into the Compositor 673
Replacing a texture with the Compositor 674
Mixing lights and shadows with the replacement texture 677
Mixing your remapped image with the original 678

CHAPTER 3: Mixing Video and 3D with Motion Tracking 681
Making Your Life Easier by Starting with Good Video 682
Knowing your camera 682
Keeping your lighting consistent 684
Having images in good focus 685
Understanding the scene 686
Getting Familiar with the Motion Tracking Workspace 687
Tracking Movement in Blender 689
Adding markers and tracking 692
Solving camera motion from tracker data 698
Setting up your scene for integrating with your video footage ... 701
Where to Go from Here 704

BOOK 6: GETTING TECHNICAL 705

CHAPTER 1: Working with Linked Data 707
Appending and Linking Datablocks between Blender Files 708
Appending datablocks 709
Linking datablocks 710
Taking Advantage of the Edit Linked Library Add-on 712
Working with Library Overrides 715
Creating a simple library override 715
Making deeper library overrides from the Properties editor and Outliner 716
Using library overrides with collections for linked characters . . . 717

CHAPTER 2: Automating Blender with Python Scripting 719
Understanding the Usefulness of Automation 720
Discovering Blender's Scripting Workspace 721
Getting Familiar with the Python Language 724
Writing Your First Blender Script 726
Writing code in the Python Console 727
Coding in the Text Editor 728
Writing a more Blender-y "Hello World" 728
Taking Advantage of Templates and Documentation 731
Adding Custom Properties to Datablocks 732

INDEX 735
