

Table of Contents

INTRODUCTION	1
About This Book	1
Foolish Assumptions	3
Icons Used in This Book	3
Beyond the Book	4
Where to Go from Here	4
 PART 1: GETTING STARTED WITH TECHNICAL ANALYSIS	 5
CHAPTER 1: Introducing Technical Analysis	7
Stepping Up to Science	9
Unpacking Lingo	10
Buy-and-Hold Is Bunk	11
Recognizing Who Uses Technical Analysis	13
Remembering the Trend Is Your Friend	13
Charting your path	14
Picking a time frame	14
Viewing the Scope of Technical Analysis	15
Charting	16
Market timing	16
Trend-following	16
Technical analysis	16
Algorithmic trading	17
Why Technical Analysis Works and What Can Go Wrong	20
Setting new rules	21
Controlling losses to protect gains	21
Why Technical Analysis Gets a Bad Rap	22
Beating the Market Is Hard Work	23
Finding Order	24
What You Need to Get Started	25
 CHAPTER 2: Tapping into the Wisdom of the Crowd	 27
Securities Are Not Socks	28
The eBay Model of Supply and Demand	30
Securities have their own economics	30
Creating demand from scratch	31
Identifying Crowd Behavior	32

Defining Normal	33
Reverting to the mean	33
Trading mean reversion	34
Breaking Normal	35
Going against the grain: Retracements	36
Recognizing why retracements happen.	37
Accepting When the Crowd Is Extreme	40
Avoiding stampedes	41
Lesser devilry — playing games with traders' heads	42
CHAPTER 3: Trade What You See: Market Sentiment	43
The Origin of Market Sentiment	44
Thinking Outside the Chart: Defending Sentiment	47
Monitoring investors: The bull/bear ratio	47
Following the money: Breadth indicators	47
Viewing volatility: The VIX.	48
New and improved sentiment indicators	48
Getting the Lowdown on Volume	49
Tracking on-balance volume	50
Refining volume indicators	50
Leading the way with spikes	51
Getting a two-for-the price-of-one coupon	52
Blindsiding Yourself	52
Understanding confirmation bias and anchoring.	53
Being aware of potential errors	54
Thinking Scientifically	55
Humility: Conditions and contingencies.	55
Sample size.	56
CHAPTER 4: Gaining Critical Advantage from Indicators	59
Overcoming Noise.	60
Distinguishing between noise and an Event	61
Knowing where noise comes from	61
Noise from inside the market	62
Indicators Give You the Edge.	62
Classifying indicators	63
Understanding what indicators identify.	64
Choosing your trading style.	64
Examining How Indicators Work.	66
Finding relevant time frames.	66
Heeding indicator signals.	67
Establishing Benchmark Levels.	69

Choosing Indicators	70
Examining Indicators in Detail.	71
Constructing a backtest	71
The other top metrics	73
Fixing the indicator	73
Evaluating the risks of backtesting	74
CHAPTER 5: Managing the Trade.	75
Finding Your Risk Profile.	76
What's your ratio?	76
Introducing positive expectancy	76
Measuring the trade	77
Considering your stake.	77
Adhering to the no-guru rule.	78
Building Trading Rules	78
Creating your trading plan with four easy rules	79
Combining indicators with trading rules	79
Trading styles.	80
Knowing How Much Is Enough	81
Using the First Line of Defense: Stop-Loss Orders.	81
Mental stops are hogwash.	82
Sorting out the types of stops	83
CHAPTER 6: Taming Uncertainty: How to Use Technical Analysis	87
Numbers Are Better than Words	87
Distinguishing between feeling and thinking	88
Realizing cognitive psychology is useful to technical trading	88
Between a rock and a hard place	90
Introducing Positive Expectancy	91
Measuring the trade	92
Considering your stake.	92
Adopting the Technical Mindset	94
CHAPTER 7: Slicing the Pie	95
Adjusting Positions	96
Scaling in.	96
Scaling out	97
What Is Asset Allocation?	97
Tharp method	98
Vince method	98

CHAPTER 8: Using AI in Technical Analysis-Based Trading	101
Exploring the Wonders of Perfect Memory	102
Reviewing the Drawbacks of Using AI	103
Not knowing what to ask	103
Incomplete training	104
Cost	105
Picking an AI Program	105
Getting Acquainted with AI Tools	106
 PART 2: BUILDING INDICATORS FROM THE GROUND UP	 109
CHAPTER 9: Reading Basic Bars: How to Pounce on Opportunities	111
Building Basic Bars	112
Reality in a nutshell	112
Setting the tone: The opening price	114
Summarizing sentiment: The closing price	115
Going up: The high	117
Getting to the bottom of it: The low	119
Putting It All Together: Using Bars to Identify Trends	119
Identifying an uptrend	120
Pinpointing a downtrend	121
Overcoming Murky Bar Waters	121
Paying heed to bar series	122
Knowing when bar reading doesn't work	122
Framing Your Bars	123
Using daily data	124
Zooming out to a higher time frame	124
Zooming in to a shorter time frame	125
Applying Bar Reading in Real Time	128
 CHAPTER 10: Special Bars: An Early Warning System	 129
Finding Clues to Trader Sentiment	129
Tick and bar placement	130
Williams three-bar system	130
Trading range	131
Identifying Common Special Bars	132
Closing on a high note	132
Spending the day inside	133
Getting outside for the day	133
Finding the close at the open	133
Decoding Spikes	133

Getting Gaps.	135
Pinpointing a gap.	135
Using gaps to your advantage.	137
Filling the Gap	141
Using the Trading Range as a Tool	142
Paying attention to a changing range.	142
Determining the meaning of a range change	143
Looking at the average trading range	144
 CHAPTER 11: Redrawing the Price Bar: Japanese	
Candlesticks	149
Appreciating the Candlestick Advantage	150
Dissecting the Anatomy of a Candlestick.	150
Drawing the real body	151
Doing without a real body: The doji	152
Catching the shadow.	152
Sizing Up Emotions	155
Identifying Special Emotional Extreme Candlestick Patterns	157
Interpreting candlestick patterns	157
Turning to reversal patterns	159
Bearish engulfing candlestick	159
Shooting star	159
Continuation patterns.	159
Combining Candlesticks with Other Indicators.	161
Trading on Candlesticks Alone	163
 PART 3: FINDING PATTERNS	165
CHAPTER 12: Seeing Patterns	167
Introducing Patterns	168
Using imagination	168
Coloring inside the lines	170
Cozying Up to Continuation Patterns.	170
Ascending and descending triangles	170
Dead-cat bounce	171
Cup and handle	172
Recognizing Classic Reversal Patterns	173
Double bottom.	173
Double tops	175
The ultimate triple top: Head-and-shoulders	176
Evaluating the Measured Move.	177
Taking dictation from the pattern.	177
Resuming the trend after retracement	179
Measuring from the gap.	179
Current-day warning.	179

CHAPTER 13: Drawing Trendlines	181
Looking Closely at a Price Chart	182
Following the Rules with Rule-Based Trendlines	182
Drawing support and resistance lines	182
Using the support line to enter and exit	183
Noting breakouts and false breakouts	184
Using resistance to enter and exit	185
Being aware of the 1-2-3 Rule	187
Playing games with support and resistance lines	188
Do Prices Pivot?	189
Drawing Internal Trendlines	191
Rules for drawing a linear regression	191
Identifying trendedness	192
Using the linear regression	194
CHAPTER 14: Transforming Channels into Forecasts	197
Diving into Channel-Drawing Basics	197
The swing bar problem	198
Drawing channels by hand	198
Benefitting from channels	200
Delving into the drawbacks of channels	201
Channeling to make gains and avoid losses	201
Riding the Regression Range	201
Introducing the standard deviation	202
Drawing a linear regression channel	202
Confirming hand-drawn channels	204
Sizing up the special features of the linear regression channel	204
Discovering the drawbacks of linear regression channels	205
Dealing with Breakouts	206
Distinguishing between false breakouts and the real thing	207
Putting breakouts into context	210
PART 4: DYNAMIC ANALYSIS	213
CHAPTER 15: Using Dynamic Lines	215
Introducing the Simple Moving Average	216
Starting with the crossover rule	217
Using the moving average level rule	219
Dealing with limitations	220
Comparing moving average rules with Donchian rules	223
Magic moving average numbers	223
Adjusting the Moving Average	224
Weighted and exponential moving averages	225
Adaptive moving averages	225

Wild and woolly moving averages.	226
Choosing a moving average type	226
Using Multiple Moving Averages.	227
Putting two moving averages into play	228
Trying the three-way approach	229
Throw them all at the wall and see what sticks	230
Delving into Moving Average Convergence and Divergence	231
Calculating convergence and divergence.	232
Creating a decision tool	233
Interpreting the MACD	234
CHAPTER 16: Measuring Momentum	237
Doing the Math: Calculating Momentum.	238
Simple momentum	239
Using the rate-of-change method.	240
Pondering the Trickier Aspects of Momentum.	242
Smoothing price changes.	242
Filtering momentum.	243
Applying Momentum	244
Discovering divergence.	244
Confirming trend indicators.	245
Determining the Relative Strength Index (RSI)	245
Calculating the RSI.	246
Picturing RSI	247
Filtering RSI.	249
Using the Rest of the Price Bar: The Stochastic Oscillator.	250
Step 1: Putting a number to the fast stochastic %K	250
Step 2: Refining %K with %D	252
Fiddling with the stochastic oscillator on the chart	252
CHAPTER 17: Estimating Volatility	255
Catching a Slippery Concept	256
How volatility arises	257
Low volatility with trending	257
Low volatility without trending	258
High volatility with trending.	258
High volatility without trending.	258
Measuring Volatility.	259
Tracking the maximum move	259
Considering the standard deviation	260
Using the average true range indicator	260
Applying Volatility Measures: Bollinger Bands	262
Applying Stops with Average True Range Bands	263

CHAPTER 18: Ignoring Time to Create Better Timing	267
Focusing on Tick Bars: In the Spirit of Ignoring Time	268
Narrowing the Focus to the Move Itself: The Constant Range Bar	269
Defining a constant range bar	269
Identifying what criteria are needed	270
Catching the Big Kahuna: Point-and-Figure Charts	270
Visualizing What's Important	271
Putting each move into a column	271
Dealing with box size	273
Applying Patterns	274
Support and resistance	274
Double and triple tops and bottoms	275
Projecting Prices after a Breakout	276
Using vertical price projection	276
Applying horizontal projection	277
Combining P&F Techniques with Other Indicators	278
CHAPTER 19: Combining Techniques	279
Adding a New Indicator: Introducing Complexity	280
Choosing primary and secondary indicators	281
Inserting unexpected validators	281
Studying a classic combination	282
Sailing into Outer Space	286
The Conquistador	286
Wave with relative strength	287
Enhancing gains with selective timing	288
Trading with Limited Expectancy: Semi-System, Setup, and Guerilla Trading	288
Semi-system "discretionary" trading	289
Solving the squaring problem — setups	290
Guerrilla trading	293
CHAPTER 20: Judging Cycles and Waves	295
Defining a Cycle and a Wave	295
Starting with economics	297
Combining market metrics with cycles	298
Moving on to magic numbers	299
Using cycles	299
Cycling with Supply and Demand: The Pragmatic Mr. Wyckoff	300
Finding Universal Harmony: Hurst's Magic Numbers	301

Looking to the Moon and the Stars	302
Examining the lunar cycle	302
Adding more celestial bodies.	303
Including the sun.	303
Figuring out what's (maybe) wrong with astronomy cycle theories.	303
Following the Earth's Axis: Seasonality and Calendar Effects	304
Differentiating between seasonality and calendar effects	304
The most well-known calendar effects.	304
Examining Big-Picture Cycle Theories	305
Shining a Spotlight on the Magnificent Mr. Gann.	306
Applying core Gann concepts	306
Celebrating Gann's 50 percent retracement rule	307
Embracing the Most Popular Wave Idea: The Elliott Wave	308
Looking closer at the Elliott Wave	309
Validating retracements	310
CHAPTER 21: The Mind-Blowing Ichimoku	313
Taking a Closer Look at Ichimoku	313
Defining ichimoku and its characteristics	314
Eyeing ichimoku's differences with conventional technical analysis.	314
Adapting to new core concepts.	315
Building a cloud: Starting with moving averages	316
Grasping Why Analysts Rely on Ichimoku and Why You Can	319
Using Ichimoku in Your Analysis.	321
Venturing inside the cloud.	321
Changing time frames.	321
Trading with Ichimoku	322
PART 5: THE PART OF TENS	325
CHAPTER 22: Ten Secrets of the Top Technical Traders	327
Appreciate Probability	328
Recordkeeping Matters	328
The Trend Is Your Friend	328
Entries Count as Much as Exits	329
Stops Aren't Optional	329
Treat Trading as a Business.	330
Eat Your Spinach	330
Technical Stuff Never Goes Out of Date	331
Diversify	331
Swallow Hard and Accept Some Math	332

CHAPTER 23: Ten Rules for Working with Indicators	333
Don't Jump the Gun.....	333
Defeat Your Math Gremlins.....	334
Embrace Patterns	334
Use Support and Resistance	335
Follow the Breakout Principle	335
Watch for Convergence and Divergence	335
Backtest or Practice-Trade Honestly.....	336
Accept That Your Indicators Will Fail.....	337
Get Over the Idea of Secret Indicators.....	337
Open Your Mind	338
APPENDIX: ADDITIONAL RESOURCES	339
INDEX	345
