Contents at a Glance

Introduction 1

Book 1: Modern Java Basics 5

CHAPTER 1: Welcome to Modern Java! 7
CHAPTER 2: Getting Started with Your First Java Program 17
CHAPTER 3: Creating Your Java Development Environment 27

Book 2: Programming Basics 43

CHAPTER 1: Modern Java Programming Basics 45
CHAPTER 2: Working with Variables and Data Types 67
CHAPTER 3: Working with Numbers and Expressions 103
CHAPTER 4: Making Choices 133
CHAPTER 5: Going Around in Circles (or, Using Loops) 155
CHAPTER 6: Pulling a Switcheroo 183
CHAPTER 7: Adding Some Methods to Your Madness 199
CHAPTER 8: Handling Exceptions 219

Book 3: Object-Oriented Programming 241

CHAPTER 1: Understanding Object-Oriented Programming 243
CHAPTER 2: Making Your Own Classes 257
CHAPTER 3: Working with Statics 279
CHAPTER 4: Using Subclasses and Inheritance 289
CHAPTER 5: Using Abstract Classes and Interfaces 311
CHAPTER 6: Using the Object and Class Classes 333
CHAPTER 7: Using Inner Classes and Anonymous Classes 367
CHAPTER 8: Working with Packages and the Java Module System 379

Book 4: Strings and Other Data Types 401

CHAPTER 1: Working with Strings 403
CHAPTER 2: Working with Dates and Times 425
CHAPTER 3: Using the BigDecimal Class 447

Book 5: Data Structures 467

CHAPTER 1: Introducing Data Structures 469
CHAPTER 2: Using Arrays 499
CHAPTER 3: Using the ArrayList Class 529

COPYRIGHTED MATERIAL

CHAPTER 4: Using the LinkedList Class 543
CHAPTER 5: Creating Generic Collection Classes 555
CHAPTER 6: Using Maps and Trees 569

Book 6: Algorithms 581
CHAPTER 1: Introducing Algorithms 583
CHAPTER 2: Using Recursion 599
CHAPTER 3: Sorting 611
CHAPTER 4: Searching 625

Book 7: Programming Techniques 645
CHAPTER 1: Programming Threads 647
CHAPTER 2: Using Functional Programming and Lambda Expressions 685
CHAPTER 3: Using the Streams API 715
CHAPTER 4: Consuming Web Services with HttpClient 733

Book 8: JavaFX 755
CHAPTER 1: Hello, JavaFX! 757
CHAPTER 2: Handling Events 781
CHAPTER 3: Setting the Stage and Scene Layout 799
CHAPTER 4: Using Layout Panes to Arrange Your Scenes 821
CHAPTER 5: Getting Input from the User 855

Index 871

Table of Contents

INTRODUCTION 1
About This Book 2
Foolish Assumptions 2
Icons Used in This Book 3
Beyond the Book 4
Where to Go from Here 4

BOOK 1: MODERN JAVA BASICS 5

CHAPTER 1: Welcome to Modern Java! 7
What Is Java, and Why Is It So Great? 8
Platform independence 8
Object orientation 10
The Java API 10
Important Features of the Java Language 11
Type checking 11
Exception handling 13
Java Version Insanity 13
What's in a Name? 14

CHAPTER 2: Getting Started with Your First Java Program 17
Downloading and Installing the Java Development Kit 18
Downloading the JDK 18
Installing the JDK 18
Perusing the JDK folders 19
Setting the JAVA_HOME and path variables 19
Confirming Your Java Version 22
Creating Your First Java Program 23
Using Java Documentation 25

CHAPTER 3: Creating Your Java Development Environment 27
Getting Started with GitHub 28
Creating a Repository 29
Installing Git 31
Getting Started with IntelliJ IDEA 32
Creating a Java Project 33
Running the HelloApp Program 36
Sending Your Project to GitHub 37

BOOK 2: PROGRAMMING BASICS 43

CHAPTER 1: Modern Java Programming Basics 45

Revisiting Hello, World! 46
Running the Hello, World! Program 47
Pulling Back the Curtain 48
Unpacking System.out.println 49
Dealing with Keywords 50
Working with Statements 53
Types of statements 54
White space 55
Working with Blocks 56
Creating Identifiers 57
Crafting Comments 58
End-of-line comments 58
Traditional comments 58
JavaDoc comments 59
Introducing Object-Oriented Programming 59
Understanding classes and objects 59
Understanding static methods 60
Creating an object from a class 60
Viewing a program that uses an object 61
So, what's the difference? 64
Importing Java API Classes 65

CHAPTER 2: Working with Variables and Data Types 67

Declaring Variables 68
Declaring two or more variables in one statement 69
Declaring class variables 69
Declaring instance variables 70
Declaring local variables 71
Initializing Variables 72
Initializing variables with assignment statements 73
Initializing variables with initializers 74
Using Final Variables (Constants) 75
Working with Primitive Data Types 76
Integer types 77
Floating-point types 78
The char type 80
The Boolean type 82
Using wrapper classes 82
Using reference types 83
Inferring the data type 85
Working with Strings 86
Declaring and initializing strings 86

Combining strings 87
Converting primitives to strings 88
Converting strings to primitives 89
Converting and Casting Numeric Data 90
Automatic conversions 90
Type casting 91
Thinking Inside the Box 91
Understanding Scope 92
Shadowing Variables 94
Printing Data with System.out 95
Using standard input and output streams 95
Using System.out and System.err 97
Getting Input with the Scanner Class 98
Importing the Scanner class 99
Declaring and creating a Scanner object 99
Getting input 99
Using enum to Create Your Own Data Types 101

CHAPTER 3: **Working with Numbers and Expressions** 103
Working with Arithmetic Operators 103
Dividing Integers 106
Combining Operators 108
Using the Unary Plus and Minus Operators 109
Using Increment and Decrement Operators 110
Using the Assignment Operator 112
Using Compound Assignment Operators 114
Using the Math Class 115
Using constants of the Math class 116
Working with mathematical functions 117
Creating random numbers 120
Rounding functions 123
Formatting Numbers 125
Recognizing Weird Things about Java Math 127
Integer overflow 127
Floating-point weirdness 128
Division by zero 129

CHAPTER 4: **Making Choices** 133
Using Simple Boolean Expressions 134
Using if Statements 136
Simple if statements 136
if-else statements 139
Nested if statements 140
else-if statements 144

Using Mr. Spock's Favorite Operators (Logical Ones, of Course) 146
Using the ! operator 146
Using the & and && operators 148
Using the | and || operators 149
Using the ^ operator 150
Combining logical operators 151
Using the Conditional Operator 152
Comparing Strings 153

CHAPTER 5: **Going Around in Circles (or, Using Loops)** 155
Using Your Basic while Loop 156
The while statement 156
A counting loop 156
Breaking Out of a Loop 158
Looping Forever 158
Letting the user decide when to quit 160
Letting the user decide in another way 161
Using the continue Statement 162
Running do-while Loops 163
Validating Input from the User 165
Using the Famous for Loop 168
Understanding the formal format of the for loop 168
Scoping out the counter variable 170
Counting even numbers 171
Counting backward 172
Using for loops without bodies 173
Ganging up your expressions 174
Omitting expressions 175
Breaking and continuing your for loops 176
Nesting Your Loops 177
A simple nested for loop 177
A guessing game 178

CHAPTER 6: **Pulling a Switcheroo** 183
Battling else-if Monstrosities 183
Viewing an example else-if program 184
Creating a better version of the example program 185
Using the switch Statement 187
Viewing a boring switch example, complete with flowchart 188
Putting if statements inside switch statements 190
Creating Character Cases 191
Matching Two or More Values in a Single Case Group 192
Intentionally Leaving Out a Break Statement 193
Switching with Strings 195
Assigning a Value with a Switch Statement 196

CHAPTER 7: **Adding Some Methods to Your Madness** 199
The Joy of Methods 200
The Basics of Making Methods 200
An example. 202
Another example 203
Methods That Return Values 205
Declaring the method's return type 205
Using the return statement to return the value 206
Using a method that returns a type 207
You gotta have a proper return statement 207
Trying another version of the guessing-game program 209
Methods That Take Parameters 212
Declaring parameters 213
Scoping out parameters 214
Understanding pass-by-value 215
Trying yet another version of the guessing-game program 216

CHAPTER 8: **Handling Exceptions** 219
Understanding Exceptions 220
Witnessing an exception. 221
Finding the culprit 222
Catching Exceptions 223
A simple example 224
Another example 225
Handling Exceptions with a Preemptive Strike 227
Catching All Exceptions at Once 228
Displaying the Exception Message 230
Using a finally Block 230
Handling Checked Exceptions 233
Viewing the catch-or-throw compiler error 234
Catching FileNotFoundException 234
Throwing the FileNotFoundException 235
Throwing an exception from main 236
Swallowing exceptions 237
Throwing Your Own Exceptions 238
Using the try-with-resources Statement 239

BOOK 3: OBJECT-ORIENTED PROGRAMMING 241

CHAPTER 1: **Understanding Object-Oriented Programming** 243
What Is Object-Oriented Programming? 243
Understanding Objects. 245
Objects have identity 245

Objects have type 246
Objects have state 247
Objects have behavior 248
Understanding the Life Cycle of an Object 249
Working with Related Classes 250
Inheritance 251
Interfaces 251
Designing a Program with Objects 252
Diagramming Classes with UML 253
Drawing classes 254
Drawing arrows 255

CHAPTER 2: **Making Your Own Classes** 257
Declaring a Class 258
Picking class names 258
Knowing what goes in the class body 259
Seeing where classes live 260
Working with Members 261
Understanding fields 261
Understanding instance methods 262
Understanding visibility 263
Using Getters and Setters 264
Overloading Methods 266
Creating Constructors 268
Creating basic constructors 268
Creating default constructors 269
Calling other constructors 271
Finding More Uses for the this Keyword 272
Using Initializers 274
Using Records 275
Looking at record constructors 276
Using concise constructors with records 278

CHAPTER 3: **Working with Statics** 279
Understanding Static Fields and Methods 279
Working with Static Fields 281
Using Static Methods 282
Counting Instances 283
Preventing Instances 286
Using Static Initializers 287

CHAPTER 4: **Using Subclasses and Inheritance** 289
Introducing Inheritance 289
Motorcycles, trains, and automobiles 291
Game play 291

A businesslike example 292
Inheritance hierarchies....292
Creating Subclasses 293
Overriding Methods 295
Protecting Your Members 296
Using the this and super Keywords in Your Subclasses 297
Understanding Inheritance and Constructors 298
Using the final Keyword 300
Final methods 300
Final classes 300
Casting Up and Down 301
Determining an Object's Type 303
Poly What? 304
Creating Custom Exceptions 307
Tracing the Throwable hierarchy 307
Creating an exception class 308
Throwing a custom exception 309

CHAPTER 5: **Using Abstract Classes and Interfaces** 311
Using Abstract Classes 311
Using Interfaces 314
Creating a basic interface 315
Implementing an interface 316
Using an interface as a type 317
More Things You Can Do with Interfaces 318
Adding fields to an interface 318
Extending interfaces 319
Using interfaces for callbacks 320
Using Additional Interface Method Types 324
Two Interfaces That Enable Java Language Features 326
Sealing Your Classes 327

CHAPTER 6: **Using the Object and Class Classes** 333
The Mother of All Classes: Object 334
Every object is an Object 334
Object as a type 334
Methods of the Object class 335
Primitives aren't objects 337
The toString Method 337
Using toString 338
Overriding toString 339
The equals Method 340
Using equals 341
Overriding the equals method 342

The clone Method 346
Implementing the clone method. 347
Using clone to create a shallow copy 350
Creating deep copies 351
The Class Class. 357
Using the instanceof Operator 359
Pattern Matching with the instanceof Operator. 360
Pattern Matching with switch 362
Being Guarded. 363
Deconstructing Records 364

CHAPTER 7: **Using Inner Classes and Anonymous Classes**. 367
Declaring Inner Classes 368
Understanding inner classes 368
Viewing an example 369
Using Static Inner Classes 372
Using Anonymous Inner Classes. 373
Creating an anonymous class 374
Creating a program with an anonymous class 375

CHAPTER 8: **Working with Packages and the Java Module System**. 379
Working with Packages. 380
Importing classes and packages 380
Creating your own packages 381
An example. 383
Putting Your Classes in a JAR File 384
jar command-line options 385
Archiving a package. 386
Adding a jar to your classpath. 387
Running a program directly from an archive 388
Using Javadoc to Document Your Classes 389
Adding Javadoc comments. 389
Using the javadoc command 392
Viewing Javadoc pages 393
Using the Java Module System 395
Understanding modules. 396
The module-info.java file 397
Setting up folders for a module 398
Compiling a module 399
Creating a modular JAR file 399
Running a modular JAR file. 400

BOOK 4: STRINGS AND OTHER DATA TYPES 401

CHAPTER 1: Working with Strings 403
Reviewing Strings 404
Using the String Class 406
Finding the length of a string 408
Making simple string modifications 409
Extracting characters from a string 409
Extracting substrings from a string 411
Splitting a string 412
Replacing parts of a string 414
Stripping a string 415
Determining Whether a String Is Empty 416
Using the StringBuilder and StringBuffer Classes 418
Creating a StringBuilder object 419
Using StringBuilder methods 419
Viewing a StringBuilder example 421
Using the CharSequence Interface 422
Using Text Blocks 422

CHAPTER 2: Working with Dates and Times 425
Pondering How Time Is Represented 426
Picking the Right Date and Time Class for Your Application 427
Using the now Method to Create a Date-Time Object 428
Using the parse Method to Create a Date-Time Object 430
Using the of Method to Create a Date-Time Object 431
Using the Month enumeration 432
Using the ZoneId class 433
Using the ZoneOffset class 434
Looking Closer at the LocalDate Class 434
Extracting Information about a Date 436
Comparing Dates 437
Calculating with Dates 438
Formatting Dates 440
Looking at a Fun Birthday Calculator 442

CHAPTER 3: Using the BigDecimal Class 447
Seeing Why Java Can't Add 447
Double trouble 449
Another example 449
BigDecimal to the Rescue! 451
Creating BigDecimal Objects 452
Doing BigDecimal Arithmetic 454
Rounding BigDecimal Values 457

The fundamentals of scale 457
How to round 458
Comparing BigDecimal Values 460
Converting BigDecimals to Strings 462
Revisiting Sales Tax 463

BOOK 5: DATA STRUCTURES 467

CHAPTER 1: Introducing Data Structures 469
Imagining Models of Computation 470
Musing about word RAM memory 471
Considering the CPU in the word RAM model 472
Defining Data Structures 474
Quantifying Performance 476
Analyzing Arrays 478
Looking at Linked Lists 481
Doubling Down with Doubly Linked Lists 488
Surmising Stacks and Queues 490
Musing about Maps 491
Checking Out Hash Maps 492
Tackling Trees 494
Checking Out Binary Trees 496

CHAPTER 2: Using Arrays 499
Understanding Arrays 499
Creating Arrays 500
Initializing an Array 502
Using for Loops with Arrays 502
Solving Homework Problems with Arrays 503
Using the Enhanced for Loop 506
Using Arrays with Methods 507
Using Varargs 508
Using Two-Dimensional Arrays 509
Creating a two-dimensional array 510
Accessing two-dimensional array elements 511
Initializing a two-dimensional array 512
Using jagged arrays 513
Going beyond two dimensions 515
Working with a Fun but Complicated Example: A Chessboard 516
Using the Arrays Class 523
Filling an array 524
Copying an array 525

Sorting an array 527
Searching an array. 527
Comparing arrays 528
Converting arrays to strings. 528

CHAPTER 3: **Using the ArrayList Class** 529
Understanding the ArrayList Class 530
Creating an ArrayList Object 533
Adding Elements 534
Accessing Elements 535
Printing an ArrayList 536
Using an Iterator 536
Updating Elements 538
Deleting Elements 540

CHAPTER 4: **Using the LinkedList Class** 543
Understanding the LinkedList Class 544
Creating a LinkedList. 548
Adding Items to a LinkedList 549
Retrieving Items from a LinkedList 551
Updating LinkedList Items 552
Removing LinkedList Items 553

CHAPTER 5: **Creating Generic Collection Classes** 555
Why Generics? 556
Creating a Generic Class. 557
A Generic Stack Class 559
Using Wildcard-Type Parameters 562
A Generic Queue Class 564

CHAPTER 6: **Using Maps and Trees** 569
Mastering Maps 569
Using the HashMap Class. 570
Creating a hash map 573
Adding elements to a hash map 574
Retrieving elements from a hash map 576
Replacing entries from a hash map 576
Removing Entries from a Hash Map 578
Treating a hash map as a collection 579

BOOK 6: ALGORITHMS 581

CHAPTER 1: Introducing Algorithms 583
What Is an Algorithm? 584
Classifying Algorithms 585
Brute-force algorithms 585
Divide-and-conquer algorithms 587
Backtracking algorithms 588
Dynamic algorithms 590
Some Fun Algorithm Challenges 592
Fizz buzz 592
Roman numerals 593
Spelling out dollar amounts 595
Determining if a tic-tac-toe game is over 595
Scheduling a tournament 596

CHAPTER 2: Using Recursion 599
Calculating the Classic Factorial Example 599
The nonrecursive solution 600
The recursive solution 600
Displaying Directories 602
Playing the Towers of Hanoi 606

CHAPTER 3: Sorting 611
Looking at the Bubble Sort Algorithm 611
Introducing the Quicksort Algorithm 615
Using the sort method 617
Using the partition method 618
Putting it all together 620

CHAPTER 4: Searching 625
Creating a Data Structure Worth Searching 626
Looking at Linear Searching 631
Using a Binary Search 635

BOOK 7: PROGRAMMING TECHNIQUES 645

CHAPTER 1: Programming Threads 647
Understanding Threads 648
Creating a Thread 649
Understanding the Thread class 650
Extending the Thread class 651
Creating and starting a thread 652
Implementing the Runnable Interface 653
Using the Runnable interface 653

Creating a class that implements Runnable 654
Using the CountDownApp class 655
Creating Threads That Work Together....657
Considering Thread Safety....661
Using the volatile Keyword for Thread Safety....663
Using the AtomicInteger Class for Thread Safety....666
Using the synchronized Keyword for Thread Safety 670
Using the ReentrantLock Class for Thread Safety 672
Coping with Threadus Interruptus 676
Finding out whether you've been interrupted 676
Aborting the countdown 677
Considering Virtual Threads 682

CHAPTER 2: **Using Functional Programming and Lambda Expressions** 685

Introducing Functional Programming 686
Introducing Functional Interfaces....690
Creating a basic functional interface 690
Implementing a functional interface with a class....690
Adding default methods....692
Adding static methods 694
Using the @FunctionalInterface annotation 695
Looking at a complete functional interface program....696
Using Lambda Expressions 698
Looking at a simple lambda expression....699
Passing multiple parameters to lambdas 702
Using block lambdas....704
Passing a lambda expression to a method 705
Using the java.util.function Package....706
Extending a predefined functional interface....710
Using Method References Instead of Lambdas 712

CHAPTER 3: **Using the Streams API** 715

Stepping into Streams 716
Peering at pipelines....717
Sizing up the Stream interface....719
Creating a stream 721
Sifting a stream with a filter....722
Transforming stream elements with a map 723
Putting things in order with sorted()....723
Finishing up with forEach()....724
Welcome to the Daisy Hill Sloth Sanctuary 725
Opting for Optionals....730

CHAPTER 4: **Consuming Web Services with HttpClient** 733
Introducing Web Services 733
Understanding HTTP 736
Diving into HTTP 737
Looking at a simple HTTP exchange 742
Getting Started with Java's HTTP Client Library 742
HttpClient 743
HttpRequest 744
HttpResponse 747
Using the send method 748
Putting It All Together 749
The HTTP Tester Program 751

BOOK 8: JavaFX 755

CHAPTER 1: **Hello, JavaFX!** 757
Perusing the Possibilities of JavaFX 758
Getting Ready to Run JavaFX 759
Looking at a Simple JavaFX Program 762
Importing JavaFX Packages 764
Extending the Application Class 765
Launching the Application 766
Overriding the start Method 767
Creating a Button 768
Handling an Action Event 770
Creating a Layout Pane 771
Making a Scene 773
Setting the Stage 773
Examining the Click Counter Program 774

CHAPTER 2: **Handling Events** 781
Examining Events 782
Handling Events 783
Implementing the EventHandler Interface 785
Handling Events with Inner Classes 788
Handling Events with Anonymous Inner Classes 790
Using Lambda Expressions to Handle Events 793

CHAPTER 3: **Setting the Stage and Scene Layout** 799
Examining the Stage Class 800
Examining the Scene Class 803
Switching Scenes 805
Creating an Alert Box 809
Exit, Stage Right 813

Creating a Close button 815
Handling the CloseRequest event 816
Putting it all together 818

CHAPTER 4: **Using Layout Panes to Arrange Your Scenes** 821
Working with Layout Panes 822
Introducing five JavaFX layout panes 822
Creating layout panes 823
Combining layout panes 824
Using the HBox Layout 824
Spacing Things Out 826
Adding Space with Margins 828
Adding Space by Growing Nodes 829
Using the VBox Layout 831
Aligning Nodes in a Layout Pane 833
Using the Flow Layout 834
Using the Border Layout 838
Using the GridPane Layout 841
Sketching out a plan 841
Creating a grid pane 842
Working with grid pane constraints 845
Examining a grid pane example 847

CHAPTER 5: **Getting Input from the User** 855
Using Text Fields 856
Validating Numeric Data 863
Using Check Boxes 865
Using Radio Buttons 867

INDEX 871
