Contents at a Glance

Introduction 1

Part 1: Getting Started with Astrobiology 5
CHAPTER 1: Astrobiology in a Nutshell 7
CHAPTER 2: Origins of Astrobiology 15
CHAPTER 3: Modern Astrobiology 29

Part 2: Origins of Life on Earth 41
CHAPTER 4: Defining Life 43
CHAPTER 5: History of Life on Earth 57
CHAPTER 6: From Chemicals to Cells 71
CHAPTER 7: Multicellular Life 87
CHAPTER 8: Recreating the Origins of Life 99
CHAPTER 9: Life in the Extremes 111

Part 3: Searching for Life in Our Solar System 131
CHAPTER 10: Comets 133
CHAPTER 11: Impacts and Origins: Meteorites 149
CHAPTER 12: Mars 165
CHAPTER 13: Ocean Worlds 183
CHAPTER 14: Life in the Clouds 201

Part 4: Life beyond Our Solar System 207
CHAPTER 15: Astrochemistry 209
CHAPTER 16: Habitable Exoplanets 221
CHAPTER 17: Extra-Terrestrial Intelligence and Technosignatures 237

Part 5: Astrobiology and Culture 253
CHAPTER 18: Hoaxes and Conspiracies 255
CHAPTER 19: Astrobiology in Arts and Culture 265

Part 6: The Part of Tens 275
CHAPTER 20: Ten Questions in Astrobiology 277
CHAPTER 21: Ten Future Astrobiology Missions 283

INTRODUCTION 1
About This Book 2
Foolish Assumptions 3
Icons Used in This Book 3
Beyond the Book 4
Where to Go from Here 4

PART 1: GETTING STARTED WITH ASTROBIOLOGY 5

CHAPTER 1: Astrobiology in a Nutshell 7
Asking the Big Questions 8
The Scope of Astrobiology 9
Origins of Life on Earth 9
Defining life 9
Classifying life 10
Understanding the earliest life 10
Probing life's limits 11
Searching for Life in Our Solar System 11
Comets and meteorites 11
Planets and moons 12
Life beyond Our Solar System 13
Astrobiology and Culture 13

CHAPTER 2: Origins of Astrobiology 15
Watching the Night Sky 16
Ancient observers 16
Philosophers of the universe 17
The telescope arrives 19
Beyond the visible 21
Wondering about the Origins of Life 22
Atoms and elements 22
Theories on the origins of life 23
Investigating the very small 24
Evolution by natural selection 25
Heredity and genes 26
Evolving Astrobiology 27
From philosophy to sci-fi to science 27
Exobiology becomes astrobiology 28

CHAPTER 3: **Modern Astrobiology** 29
From Exobiology to Astrobiology 29
Giant Telescopes 31
Earth-based behemoths 31
Eyes in the sky 33
Space Missions 35
To orbit, land, or rove? 36
Instruments of the trade 37
Lab Experiments 38
Earth and Analog Fieldwork 39
Computer Simulations 40

PART 2: ORIGINS OF LIFE ON EARTH 41

CHAPTER 4: **Defining Life** 43
Characteristics of Life 44
Getting organized with cells 44
Feeling energized with metabolism 46
Homeostasis 47
Growth 48
Reproduction 48
Response to the environment 49
Evolution and adaption 49
Determining What Is Alive 50
The continuum of life 50
Climbing NASA's ladder of life detection 51
Wriggling up the CoLD scale 52
Classifying Life 53
Linnaeus 54

CHAPTER 5: **History of Life on Earth** 57
Finding Clues in Ancient Rocks 58
Ordering the Earth's Rock Records 59
The Earliest Times: The Hadean 61
Zircons: The oldest rocks 62
Life in the Hadean? 62
The Rise of Life: The Archean 63
Getting Some Oxygen: The Proterozoic 64
GOEing with Great Oxygenation Event 65
Oxygen and cells 65
Life's Full Richness: The Phanerozoic 66
The Cambrian Explosion 66
Dinosaurs and extinctions 68

CHAPTER 6: **From Chemicals to Cells** 71
Setting the Stage for Life 72
Building bridges with carbon bonding 72
Gathering the ingredients for life 74
Where did life begin? 75
Building Complex Molecules 77
Stepping into the RNA World 77
Forming Protocells 81
Cellular signaling 82
Diversity of membranes 83
DNA and Information Encoding 83
Who Ate Whom? 86
Powering the cell by symbiosis 86
Greening up 86

CHAPTER 7: **Multicellular Life** 87
Working as a Team: Unicellular Cooperatives 88
Building a community: Biofilms 88
Living the slime life 89
Communication and signaling 89
Getting mobile in a grex 90
Lichens 90
Advantages of Multicellularity 92
Becoming Multicellular 93
Living the Multicellular Life 94
Differentiation and specialization 94
Taking one for the team: Cancer and apoptosis 95
Is Evolution Still Occurring? 96

CHAPTER 8: **Recreating the Origins of Life** 99
Cooking Up a Chemical Soup 100
The Miller-Urey experiment 100
Getting "muddy" with Titan's "tholins" 102
Oró's Experiments Brew Up Adenine 104
Mimicking Deep-Sea Vents 104
Testing Self-Replicating DNA 106
Minimal DNA Cells 106
Computer Simulations 107
Competing for resources in Avida 107
Simulating chemical reactions in Allchemy 108

CHAPTER 9: **Life in the Extremes** 111
Introducing the Extremophiles 112
Some Like It Hot: Thermophiles 113
Thermophile adaptions 113
Black smokers 114
Life in the Freezer: Psychrophiles 115
Psychrophile adaptions 116
Lichen the c-c-cold 116
Passing the Acid Test: Acidophiles 117
Acidophile adaptions 118
Munching on iron 118
Back to Basics: Alkaliphiles 119
Alkaliphile adaptions 119
Discovering the "Lost City" 120
Getting Salty: Halophiles 120
Halophile adaptions 121
Living the salt life 121
Surviving a drought: Xerophiles 122
Living under pressure: Piezophiles 124
Radio Ga Ga: Radioresistant organisms 126
Going above and beyond 128
Bears in space! 128

PART 3: SEARCHING FOR LIFE IN OUR SOLAR SYSTEM 131

CHAPTER 10: **Comets** 133
Comets in History 134
Omens and harbingers 134
Aristotle's theory of atmospheric vapors 135
Halley's Comet 136
Comet Appearance and Composition 137
Anatomy of a comet 137
Sandbanks or snowballs? 138
Blazing a trail: Meteor showers 138
Comet Origins and Populations 139
Visitors from the outer solar system 139
Interstellar objects 140
Comets and Life 141
Watering the Earth from space 142
Seeding the Earth: Panspermia 142
Comet Missions 144
Visiting a comet: The "Halley Armada" 145
Sampling a comet with *Stardust* 146
Landing on a comet: *Rosetta* 146

CHAPTER 11: **Impacts and Origins: Meteorites** 149
Order from Chaos: The Early Solar System 150
Packing a punch: The largest impacts 151
Meteorite Falls and Finds 152
Falling stars 153
Searching for space rocks 155
Meteorite Types and Origins 156
Carbon wonderland 157
Parent of pieces 159
Bringing Home the Bounty 161
A taxing return: Hayabusa 162
Diamond in the rough: Ryugu and Hayabusa 2 162
Bounteous Bennu and OSIRIS-REx 163

CHAPTER 12: **Mars** 165
Romancing the Red Planet 165
Schiaparelli's canals 166
Lowell's observatory 167
The Space Age Arrives 168
Taking the first photos: Mariners 4 to 7 168
The grandest canal: Mariner 9 170
Probing for life: The Vikings arrive 171
Roving and roaming on Mars 174
The History of Mars 176
The four ages of Mars 177
The tragedy of the Martian atmosphere 178
Habitability of Mars Today 178
Gasping for air: The Martian atmosphere 179
Quenching a thirst: Water 179
Getting salty with Martian soil 180
Methane and microbes 180
Future Missions 180
Returning samples 181
Protecting the home world 181

CHAPTER 13: **Ocean Worlds** 183
Missions of Discovery 183
Pioneering the space frontier 185
Voyaging farther and deeper 186
Orbiting Jupiter: *Galileo* 187
Running rings around Saturn: *Cassini–Huygens* 188
Galileo's Moons 188
Heating the mixture: Radioactivity 189
Kneading the dough: Tidal forces 190
Baking the cake: How heated moons change 190

Europa 192
Cracking up 192
Chaos 193
Enceladus 194
Titan 195
Lakes and seas 196
Interior ocean 197
Other Moons and Dwarf Planets 198
Getting salty: Ceres 198
Sibling rivalries: Ganymede and Callisto 198
Warm-hearted: Mimas, Dione, and Tethys 199
The furthest fountains: Triton 199
Life at the edge: Pluto, Charon, and the KBO crowd 200

CHAPTER 14: **Life in the Clouds** 201
Surfin' the Breeze: Aeroplankton 201
Venus 202
Livin' the high life 202
Phosphine and ammonia 204
Floating, Sinking, and Hunting on Jupiter 205

PART 4: LIFE BEYOND OUR SOLAR SYSTEM 207

CHAPTER 15: **Astrochemistry** 209
Building Atoms with Nucleosynthesis 209
The Big Bang 210
Life and death of a star 210
Stellar generations 213
Obscured by Clouds 213
Decoding the Rainbow with Spectroscopy 215
Next-Generation Radio Observatories 218

CHAPTER 16: **Habitable Exoplanets** 221
Dreaming of Many Worlds 222
Spinning Disks into New Worlds 223
Detecting Exoplanets 224
Unexpected survivors 224
Hot Jupiters! 225
Wobbling stars 225
Game of shadows 227
Detecting transits with Kepler 228
Tricks of the trade 229
Exoplanet diversity 229
Getting Comfy in the Habitable Zone 231

Exoplanet Atmospheres 233
Splitting light into colors 234
Atmospheric composition 234

CHAPTER 17: **Extra-Terrestrial Intelligence and Technosignatures** 237
Hunting for Aliens 238
Grappling with Fermi's Paradox 240
Little Green Men, WOW! 241
LGM-1 and pulsars 241
The WOW! signal 243
Scaling Up with Present Day SETI 244
Reaching Out with Active SETI 246
The Pioneer Plaque 248
The Voyager Golden Record 249
Other Technosignatures 249
Dyson Spheres and ringworlds 250
The Kardashev scale 250
Interplanetary Missions 251
Interstellar Probe and StarChip 251

PART 5: ASTROBIOLOGY AND CULTURE 253

CHAPTER 18: **Hoaxes and Conspiracies** 255
Ancient Aliens 256
The Flying Saucer Craze of 1947 258
The Roswell Incident 259
Area 51 260
Alien Abductions 261
Interstellar Spacecraft 262
Crop Circles 263

CHAPTER 19: **Astrobiology in Arts and Culture** 265
Cells and Spores from Space 266
Decoding Alien Broadcasts 267
Alien Languages 268
Alien Invasions 269
Unleashing Aliens 269
Exotic Planets 270
Extraterrestrial Anatomy 271
Alien Civilizations 272
Alien Technology 273

PART 6: THE PART OF TENS 275

CHAPTER 20: Ten Questions in Astrobiology 277
How Did Life Start on Earth? 278
When Did Life Arise on Earth? 278
Did Life Come to Earth from Elsewhere? 279
Where Did Our Water Come From? 279
Did Life Ever Start on Mars? 279
Is There Life in Ocean Worlds? 280
Must Life Be Based on DNA? 280
Is There Sentient Life Elsewhere? 280
Is Anyone Trying to Contact Us? 281
Fermi's Paradox 281

CHAPTER 21: Ten Future Astrobiology Missions 283
Cloudy with a Chance of Life: The DAVINCI Mission to Venus 283
Sampling Mars: ExoMars and MSR 285
Visiting and Landing on Europa 286
Sampling an Icy Wanderer 287
Jetting to Enceladus 287
Three Titanic Missions 288

INDEX 291
